Vernacular Bodies Mary E. Fissell, 2004-11-25 Making babies was a mysterious process in early modern England Mary Fissell employs a wealth of popular sources ballads jokes witchcraft pamphlets Prayer Books popular medical manuals to produce the first account of women's reproductive bodies in early modern cheap print Since little was certain about the mysteries of reproduction the topic lent itself to a rich array of theories The insides of women's reproductive bodies provided a kind of open interpretive space a place where many different models of reproductive processes might be plausible These models were profoundly shaped by cultural concerns they afforded many ways to discuss and make sense of social political and economic changes such as the Protestant Reformation and the Civil War They gave ordinary people ways of thinking about the changing relations between men and women that characterized these larger social shifts Fissell offers a new way to think about the history of the body by focusing on women's bodies showing how ideas about conception pregnancy and childbirth were also ways of talking about gender relations and thus all relations of power Where other histories of the body have focused on learned texts and male bodies this study looks at the small books and pamphlets that ordinary people read and listened to and provides new ways to understand how such people experienced political conflicts and social change

The Female Body in Medicine and Literature Andrew Mangham, Greta Depledge, 2013-08-15 Drawing on a range of texts from the seventeenth century to the present *The Female Body in Medicine and Literature* explores accounts of motherhood fertility and clinical procedures for what they have to tell us about the development of women's medicine The essays here offer nuanced historical analyses of subjects that have received little critical attention including the relationship between gynecology and psychology and the influence of popular art forms on so

called women's science prior to the twenty-first century. Taken together, these essays offer a wealth of insight into the medical treatment of women and will appeal to scholars in gender studies literature and the history of medicine.

Establishing and Evaluating Digital Ethos and Online Credibility Folk, Moe, Apostel, Shawn, 2016-11-09 With the wealth of information that you can find on the internet today, it is easy to find answers and details quickly by entering a simple query into a search engine. While this easy access to information is convenient, it is often difficult to separate fallacy from reality when dealing with digital sources. *Establishing and Evaluating Digital Ethos and Online Credibility* features strategies and insight on how to determine the reliability of internet sources. Highlighting case studies and best practices on establishing protocols when utilizing digital sources for research, this publication is a critical reference source for academics, students, information literacy specialists, journalists, researchers, web designers, and writing instructors.

The Structure of Evolutionary Theory Stephen Jay Gould, 2002-03-21 The world's most revered and eloquent interpreter of evolutionary ideas offers here a work of explanatory force unprecedented in our time, a landmark publication both for its historical sweep and for its scientific vision. With characteristic attention to detail, Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical Darwinism: that natural selection works on organisms, not genes or species; that it is almost exclusively the mechanism of adaptive evolutionary change; and that these changes are incremental, not drastic. Next, he examines the three critiques that currently challenge this classic Darwinian edifice: that selection operates on multiple levels, from the gene to the group; that evolution proceeds by a variety of mechanisms, not just natural selection; and that causes operating at broader scales, including catastrophes, have figured prominently in the course of evolution. Then, in a stunning tour de force that will likely stimulate discussion and debate for decades, Gould proposes his own system for integrating these classical commitments and contemporary critiques into a new structure of evolutionary thought. In 2001, the Library of Congress named Stephen Jay Gould one of America's eighty-three Living Legends, people who embody the quintessentially American ideal of individual creativity, conviction, dedication, and exuberance. Each of these qualities finds full expression in this peerless work, the likes of which the scientific world has not seen and may not see again for well over a century.

Infertility Robin E. Jensen, 2016-10-10 This book explores the arguments, appeals, and narratives that have defined the meaning of infertility in the modern history of the United States and Europe. Throughout the last century, the inability of women to conceive children has been explained by discrepant views: that women are individually culpable for their own reproductive health problems, or that they require the intervention of medical experts to correct abnormalities. Using doctor-patient correspondence, oral histories, and contemporaneous popular and scientific news coverage, Robin Jensen parses the often thin rhetorical divide between moralization and medicalization, revealing how dominating explanations for infertility have emerged from seemingly competing narratives. Her longitudinal account illustrates the ways in which old arguments and appeals do not disappear in the light of new information but instead reemerge at subsequent

often seemingly disconnected moments to combine and contend with new assertions Tracing the transformation of language surrounding infertility from barrenness to in fertility this rhetorical analysis both explicates how language was and is used to establish the concept of infertility and shows the implications these rhetorical constructions continue to have for individuals and the societies in which they live **Reassessing Epistemic Images in the Early Modern World** Ruth
