Visual Imagination:

Imagination and Experience Ingrid Vendrell Ferran, Christiana Werner, 2024-07-16 This volume brings together two philosophical research areas that have been subject to increased attention work regarding the unique character of having an experience and studies on the nature and powers of imagination The importance of imagination seems to stand in tension with the assumed unique and irreplaceable role of experience in our lives However new arguments in various philosophical debates suggest that there is a need to examine how both areas of research interrelate and can enrich one another The chapters in this volume examine whether the traditional accounts of experience and imagination need to be challenged They are divided into thematic sections that discuss epistemological ontological normative phenomenological and intersubjective questions related to experience and imagination Imagination and Experience is an essential resource for scholars and advanced students working in philosophy of mind epistemology ethics aesthetics and philosophy of psychology [A Study in Imagination](#) Horace Leslie Brittain, 1907

Fundamentals of Vocational Psychology Charles Hurlbut Griffitts,1924 This book is designed primarily to serve as a textbook for classes in vocational psychology In the selection and presentation of material I have had in mind the fundamental problems of a psychological nature which confront both the employment manager and the vocational counselor Although the former is chiefly concerned with the problem of selecting individuals fitted for given kinds of work and the latter with helping individuals select the occupations for which they are best fitted their main problems are essentially the same Of equal importance to both are the ways in which individuals differ and the methods of detecting or measuring these differences A knowledge of the cause of such differences is also of value in dealing with many practical problems in either line of work
