Seifert, 1997 *On Visualization* Erna Fiorentini, 2021-12 As an invitation to explore the all encompassing term textit visualization from a new vantage point this book suggests a topological approach to identify individual domains in the global stream of visualization practices and intentions Here particular and often hidden partly non visual or non visible forms emerge as individual distinct modes of visualizing that go beyond infographics as the idea informing most of the today understanding of visualization These modes offer frames in which to put the phenomenon of visualization with a view to notions more appropriate to the plurality of its manifestations **Decision Behaviour, Analysis and Support** Simon French, John Maule, Nadia Papamichail, 2009-07-30 A multi disciplinary exploration of how we can help decision makers to deliberate and make better decisions **A Discursive Approach to Organizational and Strategy Consulting** Wolfgang Schnelle, 2008 People who strive to set things in motion within corporations and organizations be it as managers or consultants encounter stubborn resistance Even though new strategies have been adopted the desired changes do not materialize A reorganization that was intended to finally produce clarity creates only a new round of confusion Wolfgang Schnelle co founder of the consulting firm Metaplan learned from four decades of experience in the field that it pays to think of organizations and strategy within the context of opinions interests and power and trust relationships His approach draws on organizational sociology and helps to shed light on the diverse realities of the players involved If anything is to be accomplished these realities must be moved toward convergence Organizational and strategy consultants using a discursive approach think of themselves as leaders of processes that create shared understanding This approach allows them to spot resistance early and overcome it through argumentation and discourse New and often surprising opportunities for action emerge The new concepts can then be implemented faster because thought processes have taken place in the minds of those who will subsequently perform the actions Design Management S.
