World Of Chemistry:

Exploring the World of Chemistry John Hudson Tiner, 2001-09-01 Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought Without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no television no microwave ovens or something as simple as wax paper This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries and discoverers Find out why pure gold is not used for jewelry or coins Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life See how people in the 1870s could jump over the top of the Washington Monument Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations biographical information chapter tests and an index for easy referencing *The World of Chemistry* Melvin D. Joesten, David O Johnston, John T Netteville, 1988 SUMMARY Consists of 26 programs on various chemistry topics including the atom chemical bonds the periodic table water etc The World of Science Education , 2010-01-01 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel Arab States and Sub Saharan Africa The focus of this Handbook is on science education in Asia and the scholarship that most closely supports this program The reviews of the research situate what has been accomplished within a given field in an Asian rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next The World of Chemistry [videorecording] Roald Hoffmann, Educational Film Center (Annandale, Va.), University of Maryland at College Park, Annenberg/CPB Project, Journey through the exciting world of chemistry with Nobel laureate Roald Hoffmann as your guide The foundations of chemical structures and their behavior are explored through computer animation demonstrations and on site footage at working industrial and research labs **World of Chemistry: Teacher's Edition** , 2013 **World of Physics: A-L** Kimberley A.
