Power in a Complex Global System Louis W. Pauly, Bruce W. Jentleson, 2014-05-09 Can twenty first century global challenges be met through the limited adaptation of existing political institutions and prevailing systemic norms or is a more fundamental reconstitution of governing authority unavoidable Are the stresses evident in domestic social compacts capable of undermining the fundamental policy capacity of contemporary governments This book inspired by the work of the distinguished scholar Peter J Katzenstein examines these important and pressing questions In a period of complex political transition the authors combine original research and intensive dialogue to build on Katzenstein s innovative insights They highlight his seminal work on variations in domestic structures on the role of ideologies of social partnership on the regionally differentiated foundations of political legitimation on diverse conceptions of civilization and on the idea and practice of power in a tenuous American imperium Together the chapters map the complex terrain upon which legitimate political authority and effective policy capacity will have to be reconstituted to address twenty first century global regional and state level challenges The book will be of great interest to students and scholars in international organization global governance foreign policy analysis and comparative politics

Turbulence in World Politics James N. Rosenau, 1990-07-21 In this ambitious work a leading scholar undertakes a full scale reconceptualization of international relations *Turbulence in World Politics* is an entirely new formulation that accounts for the persistent turmoil of today's world even as it also probes the impact of the microelectronic revolution the postindustrial order and the many other fundamental political economic and social changes under way since World War II To develop this formulation James N Rosenau digs deep into the workings of communities and the orientations of individuals that culminate in collective action on the world stage His concern is less with questions of epistemology and methodology and more with the development of a comprehensive theory one that is different from other paradigms in the field by virtue of its focus on the tumult in contemporary international relations The book depicts a bifurcation of global politics in which an autonomous multi centric world has emerged as a competitor of the long established state centric world A central theme is that the analytic skills of people everywhere are expanding and thereby altering the context in which international processes unfold Rosenau shows how the macro structures of global politics have undergone transformations linked to those at the micro level long standing structures of authority weaken collectivities fragment subgroups become more powerful at the expense of states and governments national loyalties are redirected and new issues crowd onto the global agenda These turbulent dynamics foster the simultaneous centralizing

and decentralizing tendencies that are now bifurcating global structures Rosenau s new work is an imaginative leap into world politics in the twenty first century There is much here to challenge traditional thought of every persuasion Michael Brecher McGill University **Annual Report** United Nations University,1997 **Catalogue** University of Wisconsin,1930 Some nos include Announcement of courses **Marxism, Communism, and Western Society: Foreign trade law** Claus Dieter Kernig,1972 **The New Europe** ,1918 **The New Europe** Robert William Seton-Watson,1918
