Squiggles And Space:

Simplicity and Complexity Floyd Fenly Merrell, 2025-12-10 Behind every apparently placid surface there lies an unruly ocean of complexity Fractals chaos theory and dissipative structures bear witness to these hidden complexities of the universe Complementing these ideas in the sciences fiction from the likes of Jorge Luis Borges Italo Calvino Thomas Pynchon and Samuel Beckett reveals our deep seated desire for simplicity while we are obliged to learn to cope with complexity And painting especially since Paul C zanne exposes the complexity pervading what we often wish to take simply as what there is Simplicity and Complexity is about simplicity and complexity order and disorder as seen through the lenses of fiction the sciences and works of art Floyd Merrell offers a nonmathematical account of chaos theory fractal geometry and the physics of complexity insofar as they are relevant to crucial facets of literature and painting created over the past century Though his account is informal he addresses technical concepts and philosophical questions and sheds new light on the authors and painters he discusses His radically interdisciplinary approach is within the mainstream of postmodern practices yet it criticizes the tendency toward facile conclusions and sweeping generalizations regarding relations between the arts the humanities and the sciences It brings a collection of disciplines under an umbrella that is protective of particular theories concepts methods and practices while revealing connecting threads in the tenuously linked web of all human endeavors to know the product of the mind and of the world Merrell gives inter disciplinarity a new horizon and continues the dialogue between the sciences and literature in a way I have not seen since Hegel tried to pull it all together in his Encyclopedia Eugen Baer Professor of Philosophy Hobart and William Smith Colleges *The Squiggle Sense* J. A. Scott Kelso, David A. Engstrøm, 2024-09-23 Either or thinking is a major stumbling block to human development and understanding In this book Kelso Engstr m offer a whole new way of looking at the world awakening a sixth sense that people didn t realize they had It draws on the profound relationship between nature s many complementary contraries and the paradigm shifting science of coordination called Coordination Dynamics The human brain mind through the multi and metastable modes of its coordination dynamics gives rise to a sentient faculty called the squiggle sense Nature s contraries are perceived not only as opposing polar states but as coexisting complementary tendencies symbolized by the squiggle Use this book to nudge your brain mind into its metastable mode again and again to better perceive the complementary dances of contraries and to transcend the detrimental narrow mindedness of polarized either or thinking As a Metastabilian you can wield your squiggle sense to enhance and advance your life **Own Your Space** Alexandra Gater, 2023-04-25 DIY YouTuber Alexandra Gater shows you how to creatively inexpensively and beautifully decorate your space in this inviting and accessible definitive guide to d cor ideas for renters and new homeowners alike Alexandra Gater represents a new generation of apartment therapists who are teaching people how to make a great home at any size with any budget Her new book is an absolute gift that is not only beautiful and approachable it s so comprehensive you ll read it refer to it and keep it under your pillow at night Maxwell

Accelerated Systems for Portable DNA Sequencing Harisankar Sadasivan, 2023-04-30 The MinION is a revolutionary handheld DNA sequencer that is inexpensive portable and can perform real time sequencing MinION is increasingly used in Precision Medicine applications However the MinION lacks portable compute power This thesis introduces two clinical applications of the MinION and identifies and solves performance bottlenecks through hardware and software solutions to enable portable microbial diagnostics Finally we discuss how our accelerated solutions will fit on a laptop with a GPU More than 99% of DNA fragments in a typical human sample are non target human which may be skipped in real time using the MinION's Read Until feature We analyze the performance of the Read Until pipeline in detecting target microbial species for targeted viral pathogen detection and microbiome abundance estimation We find new sources of performance bottlenecks basecaller in the classification of a fragment that are not addressed by past genomics accelerators While SquiggleFilter and DTWax are our solutions for targeted viral pathogen detection RawMap is for untargeted microbiome analysis We also discuss accelerating the bottleneck step in the DNA mapping software Minimap2 used in all of MinION's sequencing workflows For targeted virus detection we discuss SquiggleFilter which is a portable and programmable hardware software solution that directly analyzes MinION's raw squiggles and filters everything except target viral DNA fragments SquiggleFilter avoids the expensive basecalling step and uses hardware accelerated subsequence Dynamic Time Warping sDTW We show that our 14.3W 13.25 sq mm accelerator has 274 greater throughput and 3481 lower latency than existing GPU based solutions while consuming half the power DTWax overcomes the on chip memory limitations of SquiggleFilter by optimizing its high accuracy sDTW algorithm for GPUs resulting in a 1.92X sequencing speedup and 3.64X compute speedup costup For the untargeted classification and analysis of microbiome we discuss RawMap which is a machine learning based smart and efficient solution that reduces sequencing time and cost by 24% and computing cost by 22% We also discuss how

RawMap may be used as an alternative to the RT PCR test for viral load quantification of SARS CoV 2 Minimap2 is a software used in all MinION workflows minimap2 accelerated mm2 ax is a heterogeneous design for sequence mapping where minimap2 s bottleneck step is sped up on the GPU with bit exact output mm2 ax on an NVIDIA A100 GPU improves the bottleneck step chaining with 4 07 1 93X speedup costup over a SIMD baseline Finally we envision a portable solution to microbial diagnostics with a laptop connected to the MinION DTWax can perform targeted virus detection on the GPU and RawMap does untargeted microbiome classification on the CPU Post sequencing tasks like basecalling alignment using mm2 ax and variant calling use the GPU
