Living High and Letting Die Peter Unger, 1996-06-20 By contributing a few hundred dollars to a charity like UNICEF a prosperous person can ensure that fewer poor children die and that more will live reasonably long worthwhile lives Even when knowing this however most people send nothing and almost all of the rest send little What is the moral status of this behavior To such common cases of letting die our untutored response is that while it is not very good neither is the conduct wrong What is the source of this lenient assessment In this contentious new book one of our leading philosophers argues that our intuitions about ethical cases are generated not by basic moral values but by certain distracting psychological dispositions that all too often prevent us from reacting in accord with our commitments Through a detailed look at how these tendencies operate Unger shows that on the good morality that we already accept the fatally unhelpful behavior is monstrously wrong By uncovering the eminently sensible ethics that we've already embraced fully and by confronting us with empirical facts and with easily followed instructions for lessening serious suffering appropriately and effectively Unger's book points the way to a compassionate new moral philosophy
