Argumentation Schemes for Presumptive Reasoning Douglas Walton, 2013-11-05 Recent concerns with the evaluation of argumentation in informal logic and speech communication center around nondemonstrative arguments that lead to tentative or defeasible conclusions based on a balance of considerations Such arguments do not appear to have structures of the kind traditionally identified with deductive and inductive reasoning but are extremely common and are often called plausible or presumptive meaning that they are only provisionally acceptable even when they are correct How is one to judge by some clearly defined standard whether such arguments are correct or not in a given instance The answer lies in what are called argumentation schemes forms of argument structures of inference that enable one to identify and evaluate common types of argumentation in everyday discourse This book identifies 25 argumentation schemes for presumptive reasoning and matches a set of critical questions to each These two elements the scheme and the questions are then used to evaluate a given argument in a particular case in relation to a context of dialogue in which the argument occurred In recent writings on argumentation there is a good deal of stress placed on how important argumentation schemes are in any attempt to evaluate common arguments in everyday reasoning as correct or fallacious acceptable or questionable However the problem is that the literature thus far has not produced a precise and user friendly enough analysis of the structures of the argumentation schemes themselves nor have any of the documented accounts been as helpful accessible or systematic as they could be especially in relation to presumptive reasoning This book solves the problem by presenting the most common presumptive schemes in an orderly and clear way that makes them explicit and useful as precisely defined structures As such it will be an indispensable tool for researchers students and teachers in the areas of critical thinking argumentation speech communication informal logic and discourse analysis
