Virtual War:

Virtual War Gloria Skurzynski,2004 In a future world where global contamination has necessitated limited human contact three young people with unique genetically engineered abilities are teamed up to wage a war in virtual reality War, Virtual War and Society Andrew R. Wilson,Mark Lloyd Perry,2008 Rarely do academics and policymakers have the opportunity to sit down together and contemplate the broadest consequences of war Our comprehension has traditionally been limited to war s causes execution promotion opposition and immediate political and economic ends and aftermath But just as public health researchers are becoming aware of unexpected subtle and powerful consequences of human economic action we are beginning to realize that war has many short and long term consequences that we poorly understand but cannot afford to neglect These papers contribute to a growing discourse among academics scholars and lawmakers that is questioning and rethinking the nature and purpose of war By studying the effects of war on communities we can more readily understand and anticipate the consequences of present and future conflicts Such an understanding might well enable us to plan and execute military action with a more clearly defined set of post war goals in mind Whereas traditionally a government at war seeks the defeat of the adversary as its primary and often sole aim through a clearer understanding of war s effects other aims will also become prominent War like surgery could gradually become more refined could minimize damage in ways that are currently unimaginable and could involve an increasingly heavy responsibility to prepare for and facilitate reconstruction Projects such as this volume are of course only the beginning The more we understand the evolving nature of war the better prepared we will be to protect communities from its harmful effects **Virtual War G.** Skurzynski,2004-01-01 In a future world where global contamination has necessitated limited human contact three young people with unique genetically engineered abilities are teamed up to wage a war in virtual reality **Virtual War** Gloria Skurzynski,2010-05-11 Imagine a life of virtual reality a childhood contained in a controlled environment with no human contact or experiences outside of the world of computer generated images Corgan has been genetically engineered by the Federation for quick reflexes high intelligence and physical superiority Everything Corgan is everything he has ever seen or done was to prepare him for one moment a bloodless computer controlled virtual war When Corgan meets his two fellow warriors he begins to question the Federation Now Corgan must decide where his loyalties lie what he s willing to fight for and exactly what he wants in return His decisions will affect not only these three virtual warriors but all the people left on earth *Virtual War and Magical Death* Neil L. Whitehead,Sverker Finnström,2013-04-19 *Virtual War and Magical Death* is a provocative examination of the relations between anthropology and contemporary global war Several arguments unite the collected essays which are based on ethnographic research in varied locations including Guatemala Uganda and Tanzania as well as Afghanistan Pakistan Iraq and the United States Foremost is the contention that modern high tech warfare as it is practiced and represented by the military the media and civilians is analogous to rituals of magic and sorcery Technologies of

virtual warfare such as high altitude bombing remote drone attacks night vision goggles and even music videos and computer games that simulate battle reproduce the imaginative worlds and subjective experiences of witchcraft magic and assault sorcery long studied by cultural anthropologists Another significant focus of the collection is the U S military s exploitation of ethnographic research particularly through its controversial Human Terrain Systems HTS Program which embeds anthropologists as cultural experts in military units Several pieces address the ethical dilemmas that HTS and other counterinsurgency projects pose for anthropologists Other essays reveal the relatively small scale of those programs in relation to the military s broader use of and ambitions for social scientific data Contributors Robertson Allen Brian Ferguson Sverker Finnström Roberto J González David H Price Antonius Robben Victoria Sanford Jeffrey Sluka Koen Stroeken Matthew Sumera Neil L Whitehead

War and Virtual War, 2021-10-25 If the practice of war is as old as human history so too is the need to reflect upon war to understand its meaning and implications The Pre Socratic philosopher Heraclitus asserted in 600BC that War polemos is justice thus inaugurating a long philosophical tradition of consideration of the morality of war In recent times the increased specialisation of academic disciplines has led to a fragmentation of the thematic of war within the academy the topic of war is as likely to be addressed by sociologists cultural theorists psychologists and even computer scientists as it is by historians philosophers or political scientists This diversity of disciplinary approaches to war is undoubtedly fruitful in itself but can lead to an isolation of respective disciplinary analyses of war from each other In July 2002 at Mansfield College Oxford an inter disciplinary conference on war entitled War and Virtual War was held so as to redress some of this disciplinary isolationism and to forge an integrative dialogue on war in all its facets The papers in this volume were nominated by delegates as the most paradigmatic of the ethos of the original project and the most successful in achieving its aims of inter disciplinaryity and critical dialogue

The Virtual War Michael Ignatieff, 2000 Jack

Virtual War Michael Ignatieff, 2001-06-02 Virtual War describes the latest phase in modern combat war fought by remote control Kosovo was such a virtual war a war in which US and NATO forces did the fighting but only Kosovars and Serbs did the dying Ignatieff raises the troubling possibility that virtual wars so much easier to fight could become the way superpowers impose their will in the century ahead
