Pegler, Anne Kong, 2018-02-22 Revised edition of Visual merchandising and display c2012 Boutiques and Other Retail Spaces David Vernet, Leontine de Wit, 2007-08-17 Presenting a critical and theoretical dimension to retail design Boutiques and Other Retail Spaces links the ideas behind it to real practice in this innovative and important contribution to architectural interior theory literature Retail structure has been subject to a dramatic and ongoing transformation over the past thirty years materializing in the emergence of large scale out of town shopping centres and new specialized shops in city centres These specialized boutiques are highly designed involving well known architectural firms such as OMA Rem Koolhaas David Chipperfield Herzog de Meuron amongst others With case studies and over 100 black and white images Vernet and de Wit set forth original and well grounded theory to accompany this popular and lucrative area of work **Designing the Department Store** Emily M. Orr, 2019-11-28 The book builds an original argument for the department store as a significant site of design production and therefore offers an alternative interpretation to the mainstream focus on consumption within retail history Emily M Orr presents a fresh perspective on the rise of modern urban consumer culture of which the department store was a key feature By investigating the production processes of display as well as fascinating information about display making s tools and technologies the skills of the displayman and the meaning and context of design decisions which shaped the final visual effect are revealed In addition the book identifies and isolates display as a distinct moment in the life of the commodity and understands it as an influential channel of mediation in the shopping experience The assembly and interpretation of a diverse range of previously unexplored primary resources and archives yields fascinating new evidence showing how display achieved an agency which transformed everyday objects into commodities and made consumers out of passersby **Shopping and the Senses, 1800-1970** Serena Dyer, 2022-03-12 This book demonstrates the primacy of touch smell taste sight and sound within the retail landscape It shows that histories of the senses body and emotions were inextricably intertwined with processes and practices of retail and consumption Shops are sensory feasts From the rustle of silk to the tempting aroma of coffee the multi sensory appeal of goods has long been at the heart of how we shop This book delves into and beyond this seductive idyl of consumer sensuality Shopping was a sensory activity for consumers and retailers alike but this experience was not always positive This book is inhabited by tired feet and weary workers as well as eager shoppers It considers embodied sensory experiences and practices and it represents both a celebration and interrogation of the integration of sensory histories into the study of retail and consumption Crucially this book places breathing feeling human bodies back into the retail space **Retail Store Planning & Design Manual** Michael J.
