Statistical Problem Solving:

An Introduction to Statistical Problem Solving Chapman J. McGrew, Jr., Charles B. Monroe, 1993-09-01 *Statistical Problem Solving (SPS)* Hans J. Bajaria, Richard P. Copp, 1991 *An Introduction to Statistical Problem Solving in Geography* J. Chapman McGrew, Jr., Charles B. Monroe, 2009-04-22 Written for undergraduate geography majors and entry level graduate students with limited backgrounds in statistical analysis and methods McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem solving framework Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text Without compromising statistical rigor or oversimplifying the authors stress the importance of written narratives that explain each statistical technique After introducing basic statistical concepts and terminology the authors focus on nonspatial and spatial descriptive statistics They transition to inferential problem solving including probability sampling and estimation before delving deeper into inferential statistics for geographic problem solving The final chapters examine the related techniques of correlation and regression A list of major goals and objectives is included at the end of each chapter allowing students to monitor their own progress and mastery of geographic statistical materials An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation **Statistical Problem Solving (SPS)** Hans J. Bajaria, Richard P. Copp, Society of Automotive Engineers, 1987

Statistical Problem Solving in Quality Engineering Thomas J. Kaźmierski, 1995 This hands on book provides a simplified systems for solving quality problems in design and manufacturing using statistics It covers methods for problem identification root cause analysis and corrective action implementation It aims to provide engineers and managers with proactive tools to avoid costly errors in product design and manufacturing **Problem Solving** Chris Chatfield, 1995-05-11 This book illuminates the complex process of problem solving including formulating the problem collecting and analyzing data and presenting the conclusions *An Introduction to Statistical Problem Solving in Geography* Arthur J. Lembo, Jr., J. Chapman McGrew, Jr., 2023-10-27 The fourth edition of *An Introduction to Statistical Problem Solving in Geography* continues its standing as the definitive introduction to statistics and quantitative analysis in geography Assuming no reader background in statistics the authors lay out the proper role of statistical analysis and methods in human and physical geography They delve into the calculation of descriptive summaries and graphics to explain geographic patterns and use inferential statistics parametric and nonparametric to test for differences t tests ANOVA relationships regression and correlation and spatial statistics point and area patterns spatial autocorrelation This edition introduces more advanced topics including logistic regression two factor ANOVA and spatial estimation inverse distance weighting Kriging Many chapters also include thought provoking discussions of statistical concepts as they relate to the COVID 19 pandemic Maintaining an exploratory and investigative approach throughout the authors provide readers with real world geographic issues and more

than 50 map examples Concepts are explained clearly and narratively without oversimplification Each chapter concludes with a list of major goals and objectives An epilogue offers over 150 open ended geographic situations inviting students to apply their new statistical skills to solve problems currently affecting our world

Mathematical Problem Solving and New Information Technologies Joao P. Ponte, 1992-08-11 A strong and fluent competency in mathematics is a necessary condition for scientific technological and economic progress However it is widely recognized that problem solving reasoning and thinking processes are critical areas in which students performance lags far behind what should be expected and desired Mathematics is indeed an important subject but is also important to be able to use it in extra mathematical contexts Thinking strictly in terms of mathematics or thinking in terms of its relations with the real world involve quite different processes and issues This book includes the revised papers presented at the NATO ARW Information Technology and Mathematical Problem Solving Research held in April 1991 in Viana do Castelo Portugal which focused on the implications of computerized learning environments and cognitive psychology research for these mathematical activities In recent years several committees professional associations and distinguished individuals throughout the world have put forward proposals to renew mathematics curricula all emphasizing the importance of problem solving In order to be successful these reforming intentions require a theory driven research base But mathematics problem solving may be considered a chaotic field in which progress has been quite slow

Statistical Selection Among Problem-solving Methods Carnegie-Mellon University. Computer Science Dept, Eugene Fink, 1997 Abstract The choice of an appropriate problem solving method from available methods is a crucial skill for human experts in many areas We describe a technique for automatic selection among methods based on a statistical analysis of their past performances We formalize the statistical problem involved in selecting an efficient problem solving method derive a solution to this problem and describe a selection algorithm The algorithm not only chooses among available methods but also decides when to abandon the chosen method if it proves to take too much time We extend our basic statistical technique to account for problem sizes and for similarity between problems We give empirical results of the use of this technique to select among search engines in the PRODIGY system We also test the selection technique on artificially generated performance data using several different probability distributions
