Structural Arithmetic:

Children Discover Arithmetic Catherine Stern, Margaret B. Stern, 2019-01-06 Describes the method and principles of the Stern Structural Arithmetic Method in the teaching of kindergarten to 5th grade pupils with the use of wooden manipulatives. The work was based on Gestalt principles. It was developed and tested in close association with Max Wertheimer at the New School For Social Research. **Structural arithmetic** Catherine Stern, Margaret B. Stern, Toni S. Gould, 1965 Provides a program of instruction in which number concepts are presented in a sequence and which allows the child to discover number facts for himself through experiments with concrete materials. **Structural Arithmetic III** Margaret Stern, Toni S. Gould, 2008 *Structural Arithmetic I* Margaret Stern, Toni S. Gould, 2007-01-01 **Structural Arithmetic 3** Margaret Stern, Toni S. Gould, 1992-07-30 **Structural Arithmetic II** Margaret Stern, 2018-08-16 Workbook II in the Stern Structural Arithmetic series Structural Arithmetic III Teacher's Guide Margaret Stern, Toni S. Travers, 1972 Simplicity: Ideals of Practice in Mathematics and the Arts Roman Kossak, Philip Ording, 2017-06-28 To find criteria of simplicity was the goal of David Hilbert's recently discovered twenty-fourth problem on his renowned list of open problems given at the 1900 International Congress of Mathematicians in Paris. At the same time, simplicity and economy of means are powerful impulses in the creation of artworks. This was an inspiration for a conference titled the same as this volume that took place at the Graduate Center of the City University of New York in April of 2013. This volume includes selected lectures presented at the conference and additional contributions offering diverse perspectives from art and architecture, the philosophy and history of mathematics, and current mathematical practice. **Teacher's Edition for Structural Arithmetic** Catherine Stern, Toni S. Gould, Margaret B. Stern, 1965 *PREP Report*, 1972 **Max Wertheimer and Gestalt Theory** Michael Wertheimer, 2017-07-12 The ideas of Max Wertheimer (1880-1943), a founder of Gestalt theory, are discussed in almost all general books on the history of psychology and in most introductory textbooks on psychology. This intellectual biography of Wertheimer is the first book-length treatment of a scholar whose ideas are recognized as of central importance to fields as varied as social psychology, cognitive neuroscience, problem solving, art, and visual neuroscience. King and Wertheimer trace the origins of Gestalt thought, demonstrating its continuing importance in fifteen chapters and several supplements to these chapters. They begin by reviewing Wertheimer's ancestry, family, childhood in central Europe, and his formal education. They

elaborate on his activities during the period in which he developed the ideas that were later to become central to Gestalt psychology documenting the formal emergence of this school of thought and tracing its development during World War I The maturation of the Gestalt school at the University of Berlin during 1922-1929 is discussed in detail Wertheimer's everyday life in America during his last decade is well documented based in part on his son's recollections The early reception of Gestalt theory in the United States is examined with extensive references to articles in professional journals and periodicals Wertheimer's relationships and interaction with three prominent psychologists of the time Edwin Boring Clark Hull and Alexander Luria are discussed based on previously unpublished correspondence The final chapters discuss Wertheimer's essays on democracy freedom ethics and truth and detail personal challenges Wertheimer faced during his last years His major work published after his death is *Productive Thinking* Its reception is examined and a concluding chapter considers recent responses to Max Wertheimer and Gestalt theory This intellectual biography will be of interest to psychologists and readers interested in *Teaching Arithmetic*, 1965
