*Wireless Sensor Network Technologies for the Information Explosion Era* Takahiro Hara, Vladimir I. Zadorozhny, Erik Buchmann, 2010-07-14 Wireless Sensor Network Technologies for Information Explosion Era The amount and value of information available due to rapid spread of information technology is exploding Typically large enterprises have approximately a petabyte of operational data stored in hundreds of data repositories supporting thousands of applications Data storage volumes grow in excess of 50% annually This growth is expected to continue due to vast proliferation of existing information systems and the introduction of new data sources Wireless Sensor Networks WSNs represent one of the most notable examples of such new data sources In recent few years various types of WSNs have been deployed and the amount of information generated by wireless sensors increases rapidly The information explosion requires establishing novel data processing and communication techniques for WSNs This volume aims to cover both theoretical and practical aspects related to this challenge and it explores directions for future research to enable efficient utilization of WSNs in the information explosion era The book is organized in three main parts that consider 1 technical issues of WSNs 2 the integration of multiple WSNs and 3 the development of WSNs systems and testbeds for conducting practical experiments Each part consists of three chapters
