

Television (TV), sometimes shortened to **tele** or **telly**, is a telecommunication medium used for transmitting moving images in monochrome (black and white), or in color, and in two or three dimensions and with sound.

The term can refer to a television set, a television program ("TV show"), or the medium of television transmission.

Television is a mass medium for advertising, entertainment, news, and sports. Television became available in crude experimental forms in the late 1920s, but it was still several years before the new technology would be coming to consumers.

After World War II, an improved form of black-and-white TV broadcasting became popular in the United States and Britain, and television sets became commonplace in homes, businesses, and institutions.

During the 1950s, television was the primary medium for influencing public opinion.

In the mid-1960s, color broadcasting was introduced in the US and most other developed countries.
