Abstract Entity Anaphora in Argumentative Texts Donghong Liu, 2023-08-21 This book focuses on abstract entity anaphora in argumentative texts with Asher s 1993 Segmented Discourse Representation Theory SDRT as the theoretical framework investigating its pragmatic features and exploring its referent interpretation The data sources include more than 160 000 word argumentative texts 80 000 word English texts and 80 000 word Chinese ones selected from newspapers journals and books in China and America At first a comparative study was done between Chinese and English argumentative texts so as to compare the pragmatic features of abstract entity anaphora in the two languages Then referent interpretation is explored within the SDRT framework Although SDRT can account for most of the instances of abstract entity anaphora it appears incompetent in

dealing with some phenomena in the data of our study Seven problems in SDRT were found and corresponding solutions were proposed in an attempt to improve this theory In general this book has three aspects of significance Firstly it establishes abstract entity anaphora as an independent and a special kind of anaphora Secondly the research methods are the combination of empirical study and theoretical hypotheses as well as the coalescent of dynamic study and static study Thirdly the book is not limited to the application of SDRT to Mandarin Chinese and backward anaphora Instead based on the linguistic phenomena in the data it challenges and improves the theory and it even negates some aspects and meanwhile brings forward new solutions
