Understanding Addiction Elizabeth Connell Henderson,2009-09-18 At least one of every four people in America has had some experience with addiction either personally or through a family member Addiction and its consequences cost billions of dollars each year in direct medical costs lost productivity accidents crime and corruption Yet as a disease addiction is still largely misunderstood Starting with the question what is addiction Elizabeth Connell Henderson takes the reader through the many facets of this disorder She examines the effects of addictive substances on the brain and reviews each of the major classes of substances In the development of addiction she looks at the genetic social and psychological factors Henderson shows the effects of addiction on the family and guides the reader on a journey through the course of the illness and the process of recovery Additional chapters deal with the problems associated with dual diagnosis when addiction is accompanied by other psychiatric illnesses Also chapters cover behavioral addictions such as compulsive overeating pathological gambling and sexual addiction Covered are Who becomes addicted and why What are the properties of the major addictive drugs What is the course of addiction How does addiction affect the family What constitutes recovery What are the current trends in research What organizations are available for help and how are they contacted For the addict in recovery and for the family of the afflicted Understanding Addiction provides crucial information to demystify this disease and provide clear guidance toward recovery For human resource workers attorneys social workers nurses corrections officers school counselors and teachers the book provides a framework of practical information for aiding

individual sufferers and coping with their unique struggles *The British Journal of Inebriety (alcoholism and Drug Addiction)* ,1919 Contains papers read at the quarterly meetings of the society and extracts from the discussions following them with other communications dealing with alcohol and alcoholism **The International Journal of the Addictions** ,1990 *Understanding Substance Addictions* Sophia F. Dziegielewska,2005-06 Sophia F Dziegielewska draws on her many years as a teacher and practitioner to put together this accessible well thought out overview on a variety of substance addictions and disorders the people who suffer from them and the tools available to help them Each chapter was written specifically for this book by a unique blend of academics and practitioners Their combined experiences contribute to making this book practical easy to read and thoroughly helpful in diagnosing substance disorders This book may be used in a variety of courses including drug alcohol and substance abuse courses taught in social work and human services departments and substance abuse certificate programs *Medical Council* ,1907 **Documents of the Senate of the State of New York** New York (State). Legislature. Senate,1917 **International Journal of Surgery** ,1909 Monthly index of surgery and gynecology in vol 9 **American Medicine** ,1901 **The Delinquent** ,1914 *Constructing the Social Problem: Causes of Drug Addiction in Early Soviet Medical Texts* Pavel Vasilyev,2010-12-22 Essay from the year 2010 in the subject History of Europe Ages of World Wars grade A University CEU San Pablo Madrid language English abstract In the last two decades there seems to be a consensus between Russian physicians sociologists and the general public that drug addiction should be considered a serious and threatening social problem The authorities however are unable to stop the increasing numbers of drug users Meanwhile as Ia I Gilinskii put it social deviations are the mirror of social realities and the power structure should not avoid looking in it Drug addiction became a major social problem for which no one sided solution is acceptable The attempts to approach the topic from the narrow viewpoint of some sociological or medical theory usually fail as do the methods of plain administrative repression The terms narkotik narkoman narkomaniia narkotizm are applied in a somewhat simplified manner as an unambiguous social evil and it further complicates the understanding of an already difficult phenomenon There is also a clear lack of attention towards social psychological economic and other incentives for an individual to take drugs Therefore the need for a more synthetic and complex approach is obvious and in search for it we should also look at the developments in the past and the history of drug addiction in Russia The focus of this paper is on the early Soviet period of Russian history ca 1917 1929 and on the medical texts of that period My aim will be to look at early Soviet medical texts related to recreational drugs to show how physicians described the causes of drug addiction and thus contributed to the construction of the social problem The causes of the problem are especially important and relevant for the medical discourse as the etiology of disease often gives physicians the clue to the solutions and treatment Accordingly the origins of drug addiction as described in early Soviet medical texts greatly influenced the understanding of drug addicts and practical narcotic policy among the medical community and also beyond as physicians tried to achieve symbolic domination

In particular I want to consider three large groups of potential causes that were detected by early Soviet physicians socio political such as war or revolution economical like capitalism or foreign trade and other it includes various causes on the macro and micro scale alike that range from regime of prohibition to sexual frustration to the use of drugs za kompaniiu
