Empowering Ghana's Engineering Future: A Model for Professional Education in Renewable Energy—and beyond Oduro, William, Wolf, Stefan, Gyamfi, Samuel, Akowuah, Joseph, Longmuss, Joerg, 2026-01-26 Across the globe the transition to renewable energy is redefining how we live work and think about development Yet one urgent question persists how do we prepare the next generation of engineers not just to participate in but to lead this transformation The answers lie not only in laboratories or power grids but in the classrooms workshops and collaborative spaces where young minds are shaped In Ghana the ProREG project Professional Education for Renewable Energy in Ghana emerged as an ambitious response to this challenge Anchored in a strategic partnership between the Kwame Nkrumah University of Science and Technology Kumasi and the University of Energy and Natural Resources Sunyani working closely with the Technische Universität Berlin and leading companies from both Ghana and Germany ProREG set out to bridge the persistent gap between academic training and professional practice in the renewable energy sector Funded by the German Academic Exchange Service DAAD and implemented between late 2022 and 2025 the project embraced a bold vision to co create and institutionalise a practice oriented industry relevant and scalable model for

engineering education that could help future proof Ghana's energy workforce while offering a model for the wider world. This book is a record of that journey. It tells the story of an innovative collaboration across borders, sectors and disciplines. It captures the hopes and questions we started with, the methods we tested, the obstacles we encountered and the impact we achieved. More than a project report, this publication offers insights, frameworks and inspiration for anyone seeking to modernise engineering education in service of sustainable development.

Weltweit verändert der Übergang zu erneuerbaren Energien unsere Lebensweise, unsere Arbeit und unsere Vorstellung von Entwicklung. Eine dringende Frage bleibt jedoch bestehen: Wie bereiten wir die nächste Generation von Ingenieuren darauf vor, diesen Wandel nicht nur mitzugestalten, sondern auch anzuführen? Die Antworten darauf finden sich nicht nur in Laboren oder Stromnetzen, sondern auch in Klassenzimmern, Werkstätten und Kooperationsräumen, in denen junge Köpfe geformt werden. In Ghana entstand das ProREG-Projekt Professional Education for Renewable Energy in Ghana als ambitionierte Antwort auf diese Herausforderung. Verankert in einer strategischen Partnerschaft zwischen der Kwame Nkrumah University of Science and Technology Kumasi und der University of Energy and Natural Resources Sunyani in enger Zusammenarbeit mit der Technischen Universität Berlin und führenden Unternehmen aus Ghana und Deutschland, hat sich ProREG zum Ziel gesetzt, die anhaltende Kluft zwischen akademischer Ausbildung und beruflicher Praxis im Bereich der erneuerbaren Energien zu überbrücken. Das vom Deutschen Akademischen Austauschdienst DAAD finanzierte und zwischen Ende 2022 und 2025 durchgeführte Projekt verfolgte eine klare Vision: die gemeinsame Entwicklung und Institutionalisierung eines praxisorientierten, branchenrelevanten und skalierbaren Modells für die Ingenieurausbildung, das dazu beitragen könnte, die Energiebranche Ghanas zukunftssicher zu machen und gleichzeitig ein Modell für die ganze Welt darstellt. Dieses Buch ist eine Dokumentation dieser Reise. Es erzählt die Geschichte einer innovativen Zusammenarbeit über Grenzen, Sektoren und Disziplinen hinweg. Es hält die Hoffnungen und Fragen fest, mit denen wir begonnen haben, die Methoden, die wir getestet haben, die Hindernisse, auf die wir gestoßen sind, und die Auswirkungen, die wir erzielt haben. Diese Publikation ist mehr als ein Projektbericht; sie bietet Einblicke, Rahmenbedingungen und Inspiration für alle, die die Ingenieurausbildung im Dienste einer nachhaltigen Entwicklung modernisieren wollen.

Re-imagining Communication in Africa and the Caribbean Hopeton S. Dunn, Dumisani Moyo, William O. Lesitaokana, Shanade Bianca Barnabas, 2021-01-30. This book advances alternative approaches to understanding media culture and technology in two vibrant regions of the Global South. Bringing together scholars from Africa and the Caribbean, it traverses the domains of communication theory, digital technology, strategy, media practice, reforms and corporate and cultural renewal. The first section tackles research and technology with new conceptual thinking from the South. The book then looks at emerging approaches to community, digital networks, online diaspora, entertainment and video gaming strategies. The volume then explores reforms in policy and professional practice, including in broadcast television, online newspapers, media philanthropy and business news reporting. Its final section examines the role of village

based folk media the power of popular music in political opposition and new approaches to overcoming neo colonial propaganda and external corporate hegemony This book therefore engages critically with the central issues of how we communicate produce entertain and build communities in 21st century Africa and the Caribbean
