An Analysis of Time-shared Computer Systems Allan L. Scherr,1965 Some of the aspects of the operation of time shared interactive computer systems are analyzed The emphasis is on the reaction of hardware systems to the demands that its users make upon it Simply stated the problem is to characterize both time shared systems and their users in order to be able to predict the performance of the two operating together Portions of this problem include the specification and measurement of user characteristics the development and verification of both simulation and mathematical models for time shared systems and the specification and measurement of performance matrices for such systems The user and some of the performance measurements were made on Project MAC s Compatible Time Sharing System CTSS Author **A Queuing Network Model of Multiprogrammed Time Sharing Virtual Memory System for Performance Evaluation** Udai K.
