## (and most other classes as well)

This material has been summarized from the book *Successful Math Study Skills* by Paul D. Nolting and William A. Savage.

### **Introduction:**

Skills like listening, note taking, time management, and memory are all important to understanding mathematics. Through the school year, we will practice and use these skills as we study math.

### **Why Learn Math?**

Math is part of our real everyday lives from mileage to money and from budgeting to zip codes. Not a day goes by that we are unaffected by math.

- How many miles does your car drive on a gallon of gas and how much will it cost to fill your gas tank?
- If your employer takes 20% of your gross paycheck for taxes, how much take-home pay will be left?
- Don't forget sales tax on purchases, tips paid to restaurant servers, measuring a room for new carpeting or paint, and much more.

Graduation from high school often is a step to a good job. Employers are anxious to hire and promote employees with good mathematical skills. Perhaps you wish to join the military – strong math skills will benefit you in selecting the best training areas and advancement. If you pursue careers in engineering, architecture, and the sciences, for example, a strong mathematical background will help you as you continue your formal education beyond high school.

Therefore, in addition to being a part of everyone's daily life, success in mathematics opens many job and educational opportunities.

### **Math – The Language of Numbers:**

Math has its own set of rules, laws, grammar, and vocabulary.

Symbols include the equal sign ( $=$ ), greater than ( $>$ ), less than, inclusion ( $<$ ), percentage (%), Greek letters ( $\Delta$ ,  $\theta$ ,  $\sigma$ ), and much more

New math words include, polynomial, exponent, proof, square root, postulates, theorems, etc.

Write down new math words and symbols in your notes with the definition and explanation. Include pictures/diagrams where necessary . Practice using the new symbols and words until you can pronounce, define and apply each new word, concept, or symbol.

Developing Math Learning Skills Susan C. Brown, 1989 Math Study Skills Alan Bass, 2008 This mathematics study skills workbook outlines good study habits and provides students with study strategies and tips to improve time management, organization, and test-taking skills. *Integrating Core Study Skills* Peter Elias Sotiriou, 1984 Integrative and Interdisciplinary Curriculum in the Middle School Lisa Harrison, Ellis Hurd, Kathleen Brinegar, 2020-02-24 Originally published as a special issue of the Middle School Journal, this book presents integrative curriculum as a foundational element of the middle school. By addressing the current gap in literature on curriculum integration in the middle grades, this text explores how learning can be organized around authentic concepts or questions which cut across disciplines and speak to young adolescents. Providing a current, nuanced, and comprehensive review of what it means to embrace and implement an interdisciplinary and integrative curriculum, the volume considers how educators can create and deliver a high-quality integrative curriculum which is enjoyable, challenging, and inclusive. Examples of implementation in teacher preparation programs and middle-grade classrooms showcase integrative approaches and illustrate how curricula have been key in tackling social inequities, increasing engagement with STEM, and supporting collaboration. This text will be of great interest to graduate and postgraduate students, researchers, academics, and libraries in the field of Middle School Education.
