

Prejudice....1

- A **prejudice** is a negative belief or feeling about a particular group of individuals.
- Prejudices are often passed on from one generation to the next.
- **Functions**-Prejudice is a destructive phenomenon, and it is pervasive because it serves many psychological, social, and economic functions:
- **Prejudice allows people to avoid doubt and fear.**
- *Example: Ram's parents came from a SC/ST class background but are now wealthy business owners. Ram might develop a dislike of the SC/ST class because he does not want to be identified with SC/ST People. He believes such an association would damage his claim to upper-class social status.*
- **Prejudice gives people scapegoats to blame in times of trouble.**
- *Example: Shyam blames his unemployment on OBC/SC/ST whom he believes are incompetent but willing to work for low wages or get preference due to their caste.*
- **Prejudice can boost self-esteem.**
- *Example: A poor Brahmin in Indian Village could feel better about his own meager existence by insisting on his superiority to other caste .*
