Michael Green, 1983 *Truth and the World* Jonathan Tallant, 2017-10-16 How do we explain the truth of true propositions Truthmaker theory is the branch of metaphysics that explores the relationships between what is true and what exists It plays an important role in contemporary debates about the nature of metaphysics and metaphysical enquiry In this book Jonathan Tallant argues controversially that we should reject truthmaker theory In its place he argues for an explanationist approach Drawing on a deflationary theory of truth he shows that it allows us to explain the truth of true propositions and respond to recent arguments that purport to show otherwise He augments this with a distinction between internally and externally quantified claims externally quantified claims are claims that quantify over elements of our ontology that play an indispensable explanatory role internally quantified claims do not He deploys this union of deflationism and a distinction between kinds of quantification to pursue metaphysical inquiry sketching the implications for a number of first order debates including those in the philosophy of time modality and mathematics and also shows how this explanationist model can be used to solve the key problems that afflicted truthmaker theory Truth and the World is an important contribution to debates about truth and truthmaker theory as well as metametaphysics the metaphysics of time and the metaphysics of mathematics and is essential reading for students and scholars engaged in the study of these topics [Symbolism and Truth](#) Ralph Monroe Eaton, 1925 This is a new release of the original 1925 edition

Objects and Persons Trenton Merricks,2003 There are no statues Or rocks Or chairs Or stars But there are microscopic objects arranged statuewise and rockwise and chairwise and starwise Moreover there are in addition to microscopic objects arranged humanwise composite human beings Or so Trenton Merricks argues The ontology of Objects and Persons is motivated in large part by causal considerations One of the central ideas is that physical objects are causally non redundant physical objects cause things that are not wholly overdetermined by their proper parts Merricks eliminates statues and other inanimate composite macrophysical objects on the grounds that they would if they existed be at best

completely causally redundant Merricks defends our existence by arguing from certain facts about mental causation that we human beings cause things that are not overdetermined by our proper parts A second strand of argument for Merricks's overall ontology involves a variety of philosophical puzzles that are dealt with in illuminating and often novel ways Many other issues are addressed along the way including free will the reduction of a composite object to its parts and the ways in which identity over time can for practical purposes be a matter of convention Anyone working in metaphysics will enjoy this lucid and provocative book
