Brown, Marcia C. Inhorn, 2013-11-05 Anthropological contributions to the study of infectious disease and to the study of actual infectious disease eradication programmes have rarely been collected in one volume In the era of AIDS and the global resurgence of infectious diseases such as tuberculosis and malaria there is widespread interest and concern about the cultural ecological and political factors that are directly related to the increased prevalence of infectious disease In this book the authors have assembled the growing scholarship in one volume Chapters explore the coevolution of genes and cultural traits the cultural construction of disease and how these models influence health seeking behaviour cultural adaptive strategies to infectious disease problems the ways in which ethnography sheds light on epidemiological patterns of infectious disease the practical and ethical dilemmas that anthropologists face by participating in infectious disease programmes and the political ecology of infectious disease     **British Medical Journal**, 1909     **Readers' Guide to Periodical Literature**, 1910     *The Survey*, 1924     The Therapeutic Gazette William Brodie, Francis Edward Stewart, John J.
