**Workforce Development in Emerging Economies** Jee-Peng Tan, Kiong Hock Lee, Ryan Flynn, Viviana V. institutions Too often the conversation and actions are fragmented by intellectual administrative and operational silos which undermine effective cooperation to solve the deep challenges of building job relevant skills The book s findings based on cross sectional data for nearly 30 countries and time series data for five countries identify successes and common issues across countries in the sample In lagging countries the biggest difficulties relate to forming and sustaining strategic partnerships with employers ensuring equitable and efficient funding for vocational education and putting in place mechanisms to enhance training providers accountability for results defined by their trainees job market performance By framing WfD in the broader skills for growth context and drawing on lessons from countries where well designed WfD strategies have helped to drive sustained growth this book offers clear guidance on how to enable a more effective approach to the inevitably complex challenges of workforce development in emerging economies
