The Future Of Success:

The Future of Success Robert B. Reich, 2001-04-17 If you think it's getting harder to both make a living and make a life economist and former secretary of labor Robert Reich agrees with you Americans may be earning more than ever before but we're paying a steep price we're working longer seeing our families less and our communities are fragmenting With the clarity and insight that are his hallmarks Reich delineates what success has come to mean in our time He demonstrates that although we have more choices as consumers and investors the choices themselves are undermining the rest of our lives It is getting harder for people to be confident of what they will be earning next year or even next month At the same time our society is splitting into socially stratified enclaves the wealthier walled off and gated the poorer isolated and ignored Although the trends he discusses are powerful they are not irreversible and Reich makes provocative suggestions for how we might create a more balanced society and more satisfying lives Some of his ideas may surprise you all should spark a healthy and essential national debate

The Future Knowledge Compendium Peter Ellyard, 2023-03-03 THRIVING IN THE 21ST CENTURY Humans have a unique capability to both understand their situation in the world and to envision and act to realise their aspirations in the emerging world And most of us would welcome knowing how we can become ever more skilful at both understanding and shaping the future of our emerging world so that we can thrive in it The 21st century is very different from the 20th century Globalisation the greatest economic prosperity uplifting machine humanity has ever invented and mass education are combining to sweep humanity into an emerging interdependent global village It is creating a global educated middle class that will number 5 billion in 2030 In this emerging world a world where our future prosperity will be increasingly based on metaphysical wealth on what we know 20th century nation first competitive win lose mindsets and agendas can no longer work These now yesteryear mindsets will instead undermine our best endeavours including making our future ever more climate and pandemic safe Humanity is now beginning to learn that it now has no option but to adopt planet first collaborative win win values and mindsets if it wishes to shape our emerging global village so that it can become liveable for all ever more prosperous harmonious inclusive sustainable healthy and secure Meeting these challenges successfully will require that humanity innovates for itself a new future knowledge curriculum so that it can economically thrive in a sustainable and humane manner Peter Ellyard has asked the question what would be the contents of such a curriculum In *The Future Knowledge Compendium A Curriculum for Thriving in the 21st Century* he has sought to answer this question

between national and international interest groups are intensifying. The above state of affairs suggest that a broader understanding of the trends which may lead to a more sustainable world is needed especially those which may pave the way for future developments. In other words we need to pave the way for sustainable futures. Consistent with this reality the proposed Encyclopedia of Sustainability Futures aims to identify, document and disseminate ideas, experiences and visions from scientists, member of nongovernmental organisations, decision makers, industry representatives and citizens on themes and issues which will be important in pursuing sustainable future scenarios. In particular the publication will focus on scientific aspects as well as on social and economic ones also considering matters related to financing and infra structures which are important in pursuing a sustainable future. The Encyclopedia of Sustainability Futures will involve the contributing authors in line with the principle of co-generation from across a wide range of disciplines e.g. education and social sciences, natural sciences, engineering, the arts, languages etc. with papers adopting a long term sustainability perspective with a time horizon until 2050. The focus will be on themes which are felt as important in the future and the chapters are expected to interest and motivate a world audience. This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative.
