Designing Boundary Objects for Virtual Collaboration Marc Marheineke, 2016-09-19 Marc Marheineke explores the phenomenon of boundary objects in the process of virtual collaboration. Virtual collaboration is an interactive act that connects jointly and voluntarily collaborating individuals that are electronically linked and he examines these communities from different perspectives. All communities are characterized by their aim to conduce to shared understanding through a purposeful use of boundary objects. These objects are artefacts that serve two or more community members to establish collaboration. This book shows in a design oriented process how and when to use these boundary objects for virtual collaboration.

human resource managers business leaders and more [109 Ideas for Virtual Learning](#) Judy Breck,2006 109 IDEAS For Virtual Learning reveals the online knowledge venue that today s generation uses to learn while playing along at school to receive promotions diplomas and degrees Calling that venue the virtual knowledge ecology Judy Breck describes the networking of open content for learning online where knowledge is fresher authoritative and more compelling than at school In this book she provides her eyewitness account of the decade long ongoing cascade of what is known by humankind from traditional resources into the Internet and explains the network mechanisms that interconnect the knowledge once it gets online Breck says the resulting virtual knowledge ecology is causing students worldwide literally to study from the same virtual page The author forewarns readers to expect emerging good news as the virtual knowledge ecology opens the way for a global golden age of education in which students learn more and teachers are respected professionals Breck contends that literacy and learning follow naturally from the Internet interfacing what humankind knows A boy or girl s hands can now hold a wireless device mirroring enlightenment from a new virtual venue into his or her mind *The Perception of Virtual, Inter-Team Collaboration Within a Large, Multi-Team Project* Lisa Frigge,2020-10-27 Master s Thesis from the year 2018 in the subject Business economics Business Management Corporate Governance grade 1 3 Lund University language English abstract Our research purpose is twofold and comprises theoretical and empirical purposes The purpose of our research results in the following research question How do employees experience virtual inter team collaboration within a large multi team project Many scholars have investigated team collaboration either without specifically differentiating intra and inter team collaboration or focusing only on intra team collaboration Intra team collaboration means collaboration taking place within the context of one team whereas inter team collaboration describes the interaction process between several teams Thus in the field of organizational research we need to advance our knowledge on inter team collaboration as it is a way of working that becomes more and more popular and widespread Our practical aim is to understand collaboration in such emerging business contexts With more resources available including technological tools for individual actors and teams new ways of collaboration become apparent We want to contribute to a better understanding of collaboration in the modern sense by investigating how inter team collaboration is experienced by employees working in the same organization We especially want to highlight that although the individuals under study are separated into different teams they still belong to the same organization and work towards a common goal We believe that being assigned to different teams while still being part of the same organization is especially interesting to investigate We do this by studying the collaboration between different teams in a large financial services company called Baneal Bank the company name has been changed The studied organization resembles one of the previously illustrated new organizational designs More than 80 interdependent teams including geographically dispersed team members work on an intra organizational project to develop a new core banking system Thus our study site has certain characteristics that justify it as a site in which new organizational designs are applied and in which

new ways of collaboration are required Firstly the organization employs an Agile Methodology implying that close and continuous collaboration is needed between different interdependent teams
