Virtual Learning Communities Dina Lewis, Barbara Allan, 2005 Virtual Learning Communities is written to help managers professionals and learners planning facilitating or participating in online learning communities

THE Journal, 2000 *Innovation in Music: Cultures and Contexts* Jan-Olof Gullö, Russ Hepworth-Sawyer, Justin Paterson, Rob Toulson, Mark Marrington, 2024-03-27 Innovation in Music Cultures and Contexts is a groundbreaking collection bringing together contributions from instructors researchers and professionals Split into two sections covering creative production practices and national international perspectives this volume offers truly global outlooks on ever evolving practices Including chapters on Dolby Atmos the history of distortion creativity in the pandemic and remote music collaboration this is recommended reading for professionals students and researchers looking for global insights into the fields of music production music business and music technology

Teachers of Mathematics Working and Learning in Collaborative Groups Hilda Borko, Despina Potari, 2024-06-03 This open access book is the product of an international study which offers a state of the art summary of mathematics teacher collaboration with respect to theory research practice and policy The authors leading researchers and teachers on mathematics teacher collaboration represent a wide range of countries and cultures Chapters explore the various forms of teacher collaboration the diversity of settings and groupings in which mathematics teacher collaboration occurs the tools and resources that support mathematics teacher collaboration and are the product of collaboration and the breadth of outcomes of such collaboration Teachers experiences and learning in collaborative settings are represented through their own voices as well as the voices of researchers Forms and outcomes of collaboration are considered through a variety of theoretical perspectives and methodological approaches The authors reflect on the policy implications of this work and suggest new directions of research that take into account contextual cultural national and political dimensions that impact teachers work and learning through collaboration The book is a valuable resource for researchers practitioners and policy makers who are interested in the power of teacher collaboration and its history and potential for promoting educational innovations and equitable experiences for all teachers and learners

Professional Writing Online James E. Porter, Johndan Johnson-Eilola, 2001 Professional Writing Online is not a book but an instructional website It is the first course material intended for applied writing courses that makes full use

of the dynamic capabilities of the World Wide Web The flexibility afforded by the Web provides important advantages as a teaching tool over conventional textbooks A short handbook functions as a guide to using the site but the website itself is completely autonomous intended to be used on its own as an instructional resource for professional writing PWO offers four primary points of entry which correspond to the four major sections of the site Projects Documents Principles and Resources The Projects provide activities and exercises for inside and outside of the classroom The Documents section provides a wealth of real world examples of a variety of document types The Principles section offers explanations of the topics that are integral to an applied writing course The Resources section provides teachers and students additional materials that will be useful in the teaching and practicing of writing on the job These sections of course are interlinked so students can move back and forth among the sections to find what they need in focusing on a particular topic Overall Professional Writing Online provides far more material than a conventional textbook and provides additional links to an abundance of related material on the World Wide Web

Database ,2002 Virtual Technologies Jerzy Kisielnicki,2008 This publication presents encompassing research of the concepts and realities involved in the field of virtual communities and technologies Provided by publisher Intelligent Production Machines and Systems - 2nd I*PROMS Virtual International Conference 3-14 July 2006 Duc T. is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there s a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professionalrporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments

The Quality Yearbook, 2002 James W. Cortada,John A. Woods,2001-12 This is an annual publication designed as an anthology and reference to keep the people interested in implementing quality management up to date with thoughts and ideas in the field The book includes a selection of articles and chapters from several different current books and periodicals The goal is to expose readers to a wide sampling of the best and most recent materials on the quality perspective to managing and references for learning more and doing more in this area

Live and Online! Jennifer Hofmann,2004-02-26 This book suggests tips for the virtual classroom ways for trainers to communicate and for students to behave when body language and eye contact are eliminated The successful oline program starts with valid content and instructional design Next there must be participant motivation opportunities to collaborate and interact usable technology and an active trainer A CD Rom contains sample exercises for using whiteboards chats breakout rooms application sharing and synchronous web browsing appendices include a design checklist sample leader and participant guides vendor list and
