Digitalization has transformed the discourse of architecture that discourse is now defined by a wealth of new terms and concepts that previously either had no meaning or had different meanings in the context of architectural theory and design Its concepts and strategies are increasingly shaped by influences emerging at the intersection with scientific and cultural notions from modern information technology The new series Context Architecture seeks to take a critical selection of concepts that play a vital role in the current discourse and put them up for discussion In the context of discussions of the medial the notion of simulation plays a central role in architecture as illusion and imitation In dialogue with information technology and computer science however that notion has now taken on a new quality in architectural discourse Today when we speak of simulation we primarily think of computer simulation the technical ability to simulate processes Whereas simulation used to refer to a mode of presentation it now connects architecture with the sciences and represents a strategic and methodological instrument a tool of discovery With the scientific principle of simulation the focus shifts to the idea of modeling a dynamic system Norbert Wiener not just presenting finished products but going in search of solutions and developing systems The New Technological Condition Georg Vrachliotis, 2022-10-24 In the era of cybernetics architects suddenly encountered entirely new ways of operating technical systems buildings could be calculated using circuit diagrams creativity and imagination were confronted with the technical intelligence of thinking machines Architects found themselves in the crosshairs of cybernetics At stake was nothing less than the continued existence of the architect s inventive intelligence in a techno scientific world Today we see computing machines once so heavy losing weight while gaining power Computers are fully colonizing the human environment creating their own digital ecosystems and giving rise to forms of society and ways of being that cannot even be explained without big data Available for the first time in English as a new edition Steel Construction Manual Helmut C.
