Explore the relationship between architecture and the sensory experience with the fourth edition of this groundbreaking work First published in 1996 The Eyes of the Skin is a classic of architectural theory It asks the far reaching question why when there are five senses is one single sense sight so predominant in architectural culture and design With the ascendancy of the digital and the all pervasive use of the image electronically the subject is all the more pressing and topical since the first edition s publication Juhani Pallasmaa argues that the suppression of the other four sensory realms has led to the overall impoverishment of our built environment often diminishing the emphasis on the spatial experience of a building and architecture s ability to inspire engage and be wholly life enhancing For a student reading this text for the first time The Eyes of the Skin is a revelation It provides a fresh compelling insight into architectural culture which continues to inspire more than a quarter century after its initial publication The fourth edition of The Eyes of the Skin also features The author s latest views on the emphasis of place unfocused perception and existential experience Updates and clarifications throughout to reinforce how our sense of self in the world remains our most important sense with the greatest architectural impact An updated Foreword that touches on the current understanding of the seminal importance of the existential sense The Eyes of the Skin is a must read for all architecture students who will find its insights transformative Structure, Space and Skin
