Hormones and Structural Development Charles Rupert Stockard,1927 *Bookseller* ,1998 *Culture and the Development of Children's Action* Jaan Valsiner,1987 In this deeply probing intellectually challenging work Dr Jaan Valsiner lays the groundwork for a dynamic new cultural historical approach to developmental psychology He begins by deconstructing traditional developmental theory exposing the conceptual confusion and epistemological blind spots that he believes continue to undermine the scientific validity of its methodologies He describes the ways in which embedded cultural biases shape interventional goals and influence both the direction research takes and the ways in which research data are interpreted And he suggests ways in which researchers and clinicians can become more aware of and transcend those biases Dr Valsiner then develops a hierarchical systemic model that portrays development as an open ended dialectical process Central to Valsiner s approach is the premise that since each child is unique as are his or her life conditions deviations function or not the rate of development from a prescribed norm are just as likely to be constructive adaptations to changing

environmental pressures as symptoms of psychological disorder Drawing upon sources as varied as linguistic philosophy structural anthropology thermodynamics and systems theory as well as the work of many of the leading figures in twentieth century developmental theory Valsiner argues convincingly for an approach to developmental psychology mature enough to recognize the difference between healthy variability and dysfunction
