Green Building Framework:

Research Anthology on Environmental and Societal Well-Being Considerations in Buildings and Architecture

Management Association, Information Resources, 2021-05-28 When it comes to architecture there has been a focus on sustainable buildings and human well being in the built environment Buildings should not only be environmentally friendly and sustainable but dually focused on human health wellness and experience This includes considerations into the quality of buildings ranging from ventilation to thermal comfort along with environment considerations such as energy usage and material selection Specific architectural choices and design for buildings can either contribute to or negatively impact both society and the environment leading research in the field of architecture to be focused on environmental and societal well being in accordance with the built environment The Research Anthology on Environmental and Societal Well Being Considerations in Buildings and Architecture focuses on how the built environment is being constructed to purposefully enhance societal well being while also maintaining green standards for environmental sustainability On one side this book focuses on the specific building choices that can be made for the purpose of human well being and the occupants who will utilize the building On the other side this book also focuses on environmental sustainability from the standpoint of green buildings and environmental concerns Together these topics allow this book to have a holistic view of modern architectural choices and design This book is essential for architects IT professionals engineers contractors environmentalists interior designers civil planners regional government officials construction companies policymakers practitioners researchers academicians and students interested in architecture and how it can promote environmental and societal well being

Sustainable Approaches to Environmental Design, Materials Science, and Engineering Technologies, Vol. 1

Paolo Bagnato, Etleva Dobjani, Hasim Altan, D. Jude Hemanth, Iliaria Pigliautile, Rim Meziani, Osama Ahmed Mohamed, Ivan A. Parinov, 2025-03-26 This book highlights the sustainable innovation in environmental design materials science and engineering technologies It provides a multidisciplinary approach to addressing contemporary challenges in creating resilient efficient and health promoting built environments With contributions from leading experts the book covers a wide range of topics including architectural design urban planning sustainable materials and renewable energy technologies Also it explores sustainable solutions and innovative practices across a range of disciplines essential for the future of our built environment It examines architectural design urban planning and infrastructure highlighting approaches that promote resilience and efficiency in urban settings The book aligns with sustainable development goals providing practical insights and strategies to achieve global sustainability targets This book focuses on sustainable methodologies in material sciences exploring the latest advancements in eco friendly materials and their applications in construction The integration of renewable energy technologies is thoroughly examined showcasing how these innovations can reduce environmental impacts and enhance energy efficiency Additionally the book addresses the crucial theme of environmental integration and impacts

presenting comprehensive studies on the intersection of engineering technologies with environmental sustainability Furthermore it is an indispensable resource for professionals researchers and students dedicated to fostering sustainable development across multiple fields It offers valuable guidance on implementing sustainable practices to create a healthier and more sustainable world *Biomimicry and Sustainable Building Performance* Olusegun Aanuoluwapo Oguntona, Clinton Ohis Aigbavboa, 2024-02-01 This book on biomimicry assessment tools studies the concepts of sustainability sustainable construction practices and the evaluation categories that constitute a sustainability assessment tool By exploring and drawing lessons from biomimicry principles the book provides a nature inspired assessment tool to aid and guide the sustainable transformation of the built environment The book encapsulates the attributes of the conceptualised biomimicry assessment tool which is aimed at helping practitioners regulatory bodies and governmental and non governmental agencies in greening the built environment Owing to the dire need for country specific and tailor made tools that address developing countries needs this book serves as a practical reference and theoretical springboard for the development of sustainability assessment tools for the built environment Furthermore the book serves as a guide in navigating the path towards achieving the greening agendas of the built environment and other sectors and seeks to align the new biomimicry assessment tool with the UN Sustainable Development Goals SDGs It is important reading for academics professionals and advanced students in the built environment engineering and sustainable development *The LEED Guidelines*, 2003 A future with a diminishing supply of nonrenewable resources is raising concerns in every aspect of our lives The phrase 1sustainable2 or 1green2 development is being used to describe a wide variety of issues that take these concerns into consideration during the planning design and implementation process In an effort to increase the number of green buildings developed throughout the country the United States Green Building Council USGBC established the Leadership in Energy and Environmental Design LEED Guidelines The guidelines are a framework which assists members of a development team to quantify whether or not a project is in fact 1green2 or 1sustainable2 The guidelines provide a step by step approach within several categories associated with green development The goals of this paper will be to explore how the guidelines have already been implemented on a city level in an effort to encourage the development of green buildings Along with an understanding of how the guidelines have been used to promote green development there will be a discussion of what the potential benefits of green development would be if implemented on a county level and why such practices have not already occurred
