Structural Optimisation Using Sequential Linear Programming S. S. Bhavikatti, 2003-11-01 *Structural Optimization* William R. Spillers, Keith M. MacBain, 2009-06-10 Structural Optimization is intended to supplement the engineer's box of analysis and design tools making optimization as commonplace as the finite element method in the engineering workplace It begins with an introduction to structural optimization and the methods of nonlinear programming such as Lagrange multipliers Kuhn Tucker conditions and calculus of variations It then discusses solution methods for optimization problems such as the classic method of linear programming which leads to the method of sequential linear programming It then proposes using sequential linear programming together with the incremental equations of structures as a general method for structural optimization It is furthermore intended to give the engineer an overview of the field of structural optimization
