Structure Of Experience

Ervin Laszlo

Structure Of Experience:

System, Structure and Experience Ervin Laszlo, 2024-09-02 First Published in 1969 System Structure and Experience offers a basic information flow design capable of accounting for the complex operations of a culturally cognizant and purposive mind consistently with the general relationship of the human organism and its environment By means of the isomorphy of a hierarchically ordered series of circuits a way is opened for resolving the traditional mind body or psycho physical problems The work outlines the design of a self stabilizing and self organizing system shows that it applies to artificial biological as well as cognitive structures and then undertakes to analyze the diverse facets of perpetual scientific aesthetic and religious experience in its terms The interrelation of the two or more such multi level cognitive systems offers insights into the problems of human communication The book is a contribution to the scientific analysis of cognitive experience and promotes the transfer of the traditional domain of an introspectively founded philosophy of mind into the realm of modern system research

The Structure of Conscious Experience Lee Roy Beach, 2019-08-15 There must exist a point at which the molecular and electro chemical processes that comprise brain function are transformed into rich orderly conscious experience which seamlessly blends the present moment what led up to it and what will follow it This is the stuff of our everyday lives and it raises questions about its organization and how that organization facilitates engagement with the world at large In short what is the structure of conscious experience and what is gained by it being structured that way This book argues that the structure is what is familiarly known as narrative form and that the gain is the ability to communicate about one s experience with oneself and others as well as to make informed predictions about what will happen in the fundamentally unknowable and potentially dangerous future In the latter case because the essence of narrative form is time and causality structuring events from memory the past and from perception the present in narrative form causally implies future events expectations The potential threat the bad or the absence of good of these expected future events can be assessed and if required action can be taken to prevent their occurrence or to diminish their impact The implications about thinking and action and about who we are as individuals are also discussed here
