Operation of the Trade Agreements Program, The Year in Trade, 53rd Report 2001 , **Trade, Inequality, and Justice** Frank J. Garcia,2003 Recent crises in trade policy and globalization highlight both the problematic role of economic inequality in international trade law and the shortcomings of contemporary largely economic approaches to this problem and to international trade law generally This book argues for an alternative approach to the problem of trade and inequality as a problem of justice Drawing on political and moral theory and legal philosophy the author develops a Rawlsian model for justice as fairness in international trade law This model highlights the important normative role of the principle of special and differential treatment which can justify economic inequality by making the wealthy markets of developed states work to

the benefit of smaller economies thus satisfying the difference principle as applied to international economic relations Applying this model to contemporary trade law the author offers concrete proposals for modifying existing special and differential treatment doctrine and suggests second generation policies for the problem of inequality once special and differential treatment is either fully implemented or rendered obsolete Published under the Transnational Publishers imprint
