Technology And Responsibility:

The Imperative of Responsibility Hans Jonas,1984 Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology the threat of nuclear war ecological ravage genetic engineering and the like Though informed by a deep reverence for human life Jonas s ethics is grounded not in religion but in metaphysics in a secular doctrine that makes explicit man s duties toward himself his posterity and the environment Jonas offers an assessment of practical goals under present circumstances ending with a critique of modern utopianism

Responsibility in Science and Technology Simone Arnaldi, Luca Bianchi,2016-07-07 The present volume elucidates the scope of responsibility in science and technology governance by way of assimilating insights gleaned from sociological theory and STS and by investigating the ways in which responsibility unfolds in social processes Drawing on these theoretical perspectives the volume goes on to review a heuristic model of responsibility Such a model provides a simple tentative though no less coherent analytical framework for further examining the idea of responsibility its transformations configurations and contradictions

The Technological World Picture and an Ethics of Responsibility Egbert Schuurman,2005 What does the Judeo Christian tradition have to say about a responsible ethics of technology In these pages Schuurman discusses the need for an ethics of technology and the spiritual historical background of modern technology The spirit of the Enlightenment has produced a scientific technological picture of the world with an ethical mix of values and norms that is still current But there are alternative approaches After drawing attention to the cosmological and the ethical deficiencies in contemporary ethics Schuurman makes a case for a different approach that starts with the enlightenment of the Enlightenment that addresses these deficiencies and that implies a cultural paradigm different from the current one He frames ethics as an ethics of responsibility and highlights the priorities values and norms that such an ethic implies He also speaks to concrete possibilities inherent to this approach that could reorient our technological culture and that would lead to political changes as well His is a new perspective that will undoubtedly involve struggle but it also affords hope

Technology, Anthropology, and Dimensions of Responsibility Birgit Beck, Michael Kühler, 2020-02-19 With great power comes great responsibility In today's world with our growing technological power and the knowledge about its impact we are considered to be responsible for many instances that not long ago would have been deemed a matter of fate At the same time the looming options of e.g. genome editing or neuroprosthetics threaten traditional notions of responsibility if no longer the person but the technology involved is deemed to be responsible for a specific behaviour The growing ethical debate on the expansion of human responsibility e.g. when it comes to human machine interaction ambient intelligence or reproductive technologies thus intertwines with the challenge to formulate an appropriate understanding of the concept of personal responsibility and our respective anthropological self understanding in today's technological world The volume brings together both perspectives and aims at illuminating crucial dimensions of responsibility in light of technological innovation and our self understanding as responsible beings
