**Reruns on File** Donald G. Godfrey,2013-09-13 For more than half a century broadcast recordings have reflected an important aspect of our culture and history An increasing number of archivists and private collectors have restored and exchanged radio and television materials However despite the awareness of these primary resource materials there is still some reluctance to utilize this aural and visual history resource A part of this reluctance is due to the fact that little is known about the existence of many collections throughout the nation This volume provides a comprehensive directory of electronic media archives in the United States and Canada It describes each collection focusing on its speciality providing the serious researcher with ready access information to these electronic media program resources Focusing on both private and institutional collections it is organized by state and city with indexes to provide the scholar with subject and location of specific topics of interest

**Reclaiming History** Vincent Bugliosi,2007-05-17 For fifty years the truth about the assassination of President John F Kennedy has been obscured This book releases us from a crippling distortion of American history At 1 00 p

m on November 22 1963 President John F Kennedy was pronounced dead the victim of a sniper attack during his motorcade through Dallas That may be the only fact generally agreed upon in the vast literature spawned by the assassination National polls reveal that an overwhelming majority of Americans 75% believe that there was a high level conspiracy behind Lee Harvey Oswald Many even believe that Oswald was entirely innocent In this continuously absorbing powerful ground breaking book Vincent Bugliosi shows how we have come to believe such lies about an event that changed the course of history The brilliant prosecutor of Charles Manson and the man who forged an iron clad case of circumstantial guilt around O J Simpson in his best selling *Outrage* Bugliosi is perhaps the only man in America capable of writing the definitive book on the Kennedy assassination This is an achievement that has for years seemed beyond reach No one imagined that such a book would ever be written a single volume that once and for all resolves beyond any reasonable doubt every lingering question as to what happened in Dallas and who was responsible There have been hundreds of books about the assassination but there has never been a book that covers the entire case including addressing every piece of evidence and each and every conspiracy theory and the facts or alleged facts on which they are based In this monumental work the author has raised scholarship on the assassination to a new and final level one that far surpasses all other books on the subject It adds resonance depth and closure to the admirable work of the Warren Commission *Reclaiming History* is a narrative compendium of fact forensic evidence reexamination of key witnesses and common sense Every detail and nuance is accounted for every conspiracy theory revealed as a fraud on the American public Bugliosi s irresistible logic command of the evidence and ability to draw startling inferences shed fresh light on this American nightmare At last it all makes sense *Tuning in* Ronald Wayne Rodman, 2010 Television has been called the boob tube goof box and even a vast wasteland of American culture Yet for all its banality television is in many ways a mirror of culture and communicates messages within culture through the multiple channels of visual images language sound and music All of these channels contain their own unique coded messages to create the larger meaningful text of television As one of these sensory channels music contributes to meaning in television through its artistic language and through television viewers association of music with certain aspects of culture Music has always been an integral part of the American television even from its earliest days Like its parent medium of radio television broadcasts music to entertain viewers with live and video taped performances but music has also come to play a much larger role in television beyond its pleasurable performance aspects Music is used in narrative programs to evoke moods and identify characters and setting it is used to sell products through commercial jingles and most importantly music generally aids broadcast television in navigating through the continuous flow of daily programming This navigational aspect of television music is a distinctive feature and functions to transport the viewer through three spaces of TV the flow of the televisual apparatus with commercials newbreaks and promos the storyworld of each narrative program and the representational space between narrative and flow As *Heard on TV* is an examination and analysis of music in American

television during the first fifty years of its history The book focuses on how music has functioned to serve as a navigator through the flow of television and contributing to structure narrative programs while also conveying meaning to its viewers by correlating with the images and sounds that it accompanies Drawing from precedents of the cinema and radio the book examines music in a number of classic television genres by positing a theory of functional musical spaces adapted from theories of Charles Morris Umberto Eco John Fiske and others *Global War Crimes Tribunal Collection: The Rwanda Tribunal* ,1997
