*Media Intertextualities* Mie Hiramoto, 2012 This collection of critical essays originally published in Pragmatics and Society 1 2 2010 discusses how normative biases that shape our relation to the world are constructed through discursive practice in media discourse The intertextual perspective it adopts is crucial for our understanding of how media representations of speakers and languages shape many of our preconceptions of others Mediatization is inherently intertextual the very nature of this process involves extracting the speech behavior of particular speakers or groups from a highly specific context and refracting and reshaping it to be inserted in another stream of representation The notion of intertextuality becomes a useful concept for the linguistic anthropological study of media discourse in the context of modernity as it provides us with a tool for exploring the semiotic processes that underlie the way in which the media negotiate and reinscribe the complex relationships of identity that characterize late modern subjecthood
