Japan the Japanese government's CE policy and CE management strategy in the Japanese industrial world have lagged considerably behind. In the future when Japanese companies conduct global business transactions it will be pivotal for them to implement a CE management strategy compatible with the ISO 59000 series. The Japanese government and global companies must respond to the SDGs including Goal 12 Producer and Consumer Responsibility. To keep up with external environmental trends Japanese global firms also must respond to the changes discussed in this informative volume. [A Changemaker's Guide to the Future](#) Anders Lendager, Ditte Lysgaard Vind, 2018-12-23. This is A changemaker's guide to the future. A book to read to grasp and to act on. Our global population and resource consumption are on the rise. But with the current threats of climate change we need to lower our emissions greatly. By combining circular economy with design innovation and technology we can live up to the growing demand without affecting our environment or livability negatively. In our book on circular economy we lay out the road map for a regenerative society and provide tools, examples and incentives to harness the extraordinary power of business as a source of good. Sustainability makes viable businesses and viable businesses drive sustainable development. For us it's that simple. The choice is yours. *Strategies for Circular Economy and Cross-sectoral Exchanges for Sustainable Building Products* Marco Migliore, Cinzia Talamo, Giancarlo Paganin, 2019-09-25. This book offers a valuable tool for understanding current efforts to promote the reuse and enhancement of pre-consumer waste in the development of new products for the construction sector as well as the financial and regulatory tools being used to support this trend. It explores the vast and complex topic of the circular economy from the perspective of strategies for the reuse, recycling of waste and develops a number of key premises: waste reuse, recycling must be considered using a logic of cross-sectoriality recognizing the need to enhance the dialogue between different sectors; pre-consumer waste is particularly interesting for the recycling market because the construction sector can reduce its environmental impacts by enhancing its capacity to use secondary raw materials and by products from other sectors and lastly the manufacturing sector is currently experimenting with promising forms of reducing recycling pre-consumer waste and is at the same time providing by products that can be used in other production chains. As such the book offers a valuable asset for professionals who are interested in sustainability in construction and in the study of construction products however it will be equally useful for local decision makers tasked with implementing development policies and innovations in the industrial sector.
