

Tips For Building with Green Intention!

- 1. Understanding Ecosystem Impacts** - Consider the materials you use and what they take from the Earth through their life cycle. Look for renewables and/or materials that are long-lasting and if those aren't available, look for opportunities to reuse!
- 2. Calculate the Embodied Carbon** - These are emissions which result from harvest, manufacturing and transport. Find out what the level is on the products you are considering selecting, then pick wisely.
- 3. Assessing Ongoing Needs** - It is important to not only think about the impacts of your building project, but also the ongoing maintenance and possible ongoing energy and water needs.
- 4. Join the Red List Challenge** - Avoid this list of contaminants in the materials you build with to create a safe and healthy living environment:
