The Metaverse Dilemma Chitra Krishnan,Abhishek Behl,Snigdha Dash,Prashant Dev Yadav,2024-12-02 The Metaverse Dilemma explores a balanced viewpoint of the metaverse from both a theoretical and practical mindset examining the challenges and opportunities faced when adopting and implementing the metaverse in business and everyday scenarios

Advances in Sewn Product Technology Anita Mitchell,2024-05-09 The fashion industry continues to contribute significantly to greenhouse gas emissions It is one of the biggest polluters one of the most wasteful of all global industries and is under increasing pressure to address unsustainable practice Emerging out of the pandemic era the fashion industry is also responding to a variety of complex industry challenges such as high return rates customer demand for better fitting apparel faster fashion the drive towards personalisation and greater transparency and sustainability across the value chain These factors along with increasing labour costs are furthermore exerting force on the industry to embrace nearshoring and reshoring Based on extensive primary research involving oral histories methodology with leading industry professionals involved in the innovation of technological and digital solutions for the fashion industry this book presents the latest advances in sewn product technology which offer solutions to many of the fashion industry s current and emerging challenges whilst also informing how these developments are influencing fashion jobs of today and tomorrow This book is therefore of value to fashion students academics researchers and technicians as well as those working within the fashion industry involved in the design development manufacture buying and retail of fashion apparel

Features Provides a comprehensive insight into the latest advances in sewing machine technology including advanced automation and robotics used in the manufacture of fashion apparel Provides a comprehensive insight into the latest industrial sewing threads and needles that can effectively support sustainable design practice Exclusively covers advances in digital technologies to support sustainable practice including advances in 3D body scanning and digital measuring systems recent advances in digital pattern making and pattern design systems recent advances in 3D fashion design software and the latest advances in Product Lifecycle Management PLM systems used within the fashion industry Includes sections on advances in No Sew Seam Bonding and ultrasonic welding technologies Provides an insight into advancements in 3D cloth simulation and prototyping for apparel design and gaming Enables readers to understand the impact of the latest advances in sewn product technology on the jobs of today and tomorrow Case studies that provide working examples of advances in sewn product technology

Handbook of the Metaverse Pan Hui,Peng

Yuan Zhou, Lik-Hang Lee, Tristan Braud, 2026-01-08 The metaverse is sweeping the global thanks to its fundamentally innovative concepts of physical virtual blended reality and years of industrial efforts on relevant hardware development It is yet unclear what the metaverse is what technologies it relies on and what concern the society should care about since it is such a huge ecosystem with nearly unlimited possibilities The book aims to provide a comprehensive study on the metaverse including its development and ecosystem and detailed descriptions of multiple key technologies with their challenges and state of the art solutions finally conclude with several important societal issues the metaverse may raise including concerns and suggestions The book targets at providing understandable introductions to varied aspects of the metaverse that may appear new to common audiences and deep insights into a number of key directions for related professionals The purpose of the book is to help readers better understand the concept and current status of metaverse while inspiring relevant readers or institutes to spot interesting and challenging topics to follow The Fundamentals of Video Game Literacy Ryan

Zhao, 2025-04-16 This book posits a novel framework for sense making and meaning making in the play of video games Extending a modern process oriented audience inclusive philosophy of artistic meaning generation this book grapples with the question of how to personally and critically examine video games as artistic artifacts that do not have set predetermined standardized forms until live play is enacted The resulting artistic product live gameplay expresses both the game s developers and its players This book argues that players hold three separate concurrent perspectives during play the embodied avatar within the simulated space the role playing participant in the narrative fantasy and the external strategist manipulating the game s software affordances The exciting dynamics that arise from live gameplay are the result of the tensions and harmonies between these three parallel layers of play Video games are systems with designed behaviors capable of a great diversity of instantiated expressions Players are brought into that system of instantiated generation to produce truly emergent and personal gameplay As such players directly impact the shape and form of the gameplay artifact itself This creates a relationship between the art the player and its meaning radically different from all previous art forms This book builds around this central premise with examinations of related subjects pertaining to video game meaning making such as the ways in which video games facilitate play that is expressive of their players and the ways in which it is appropriate to compare and contextualize the differences in players instantiated play activities These subjects are designed to give readers an in depth understanding of the dynamics of gameplay in order to facilitate richer more meaningful encounters with video games as cultural artifacts This book Provides a useful framework for enriching players experiences with video game play Helps players identify and distinguish aspects of their own and game developers expression in gameplay Posits a novel framework examining the role of player as embodied avatar role player and strategist Gives players appropriate questions to better interrogate the generation of meaning from within and surrounding the system of gameplay
