## **Teacher Learning In Language Teaching:**

Teacher Learning in Language Teaching Donald Freeman, Jack C. Richards, 1996-02-23 This book introduces a new field of educational research called teacher learning as it applies to the teaching of languages. Up until recently the study of second language teacher education has focused mainly on the knowledge base and specific skills needed for effective teaching. This book invites us to look at teacher education from a fresh point of view through an exploration of the thinking and learning processes of individuals as they learn to teach. Seventeen original articles based on studies done in North America, Europe, Asia, and Australia provide examples of pioneering research into the ways that individuals learn to teach languages and the roles that previous experience, social context, and professional training play in the process. The collection thus helps establish a research base for this newly developing field.

Becoming a (Better) Language Teacher Nora Benitt, 2015-08-19 This qualitative interpretative study investigates a cohort of twelve English teachers enrolled in the M.A. programme 'E-LINGO Teaching English to Young Learners'. The aim is to explore how and under what circumstances classroom action research, a core component of the programme, can foster teacher learning. Since the participants have different educational and cultural backgrounds and various levels of professional experience in the field of language teaching, they offer different perspectives on the object of research. Data from multiple sources are triangulated and interpreted to elicit indicators for learning and development in the form of critical learning incidents. The results suggest that not only cognitive but also social and affective factors constitute the complex process of teacher learning.

**Teacher Education in CALL** Philip Hubbard, Mike Levy, 2006-01-01 This volume addresses the need for a more considered and systematic approach to teacher education and training in Computer Assisted Language Learning (CALL) in all its forms. Technology Enhanced Language Learning, Network Based Language Learning, Information and Communication Technologies for Language Learning, and so on. The 20 chapters of the book are divided into five parts: 1. foundations of teacher education in CALL; 2. CALL degree programs; 3. CALL pre-service courses; 4. CALL in-service projects, courses, and workshops; 5. alternatives to formal CALL training. The chapters cover a broad range of levels, environments, countries, and languages. Rather than simply offering inspired speculation, the chapters provide practical information to readers reporting on what has actually been done in a wide variety of teacher education programs and courses around the world. In many cases, the chapters describe how programs and courses have evolved and include either qualitative or quantitative research, or both, to inform the structure of CALL courses, tasks, and activities.
