## **The Aging Body:**

*The Aging Body* Susan Krauss Whitbourne, 2012-12-06 The objective of this book is to provide information that will be useful to people in a variety of disciplines who wish to learn more about normal aging processes in the human body Although gerontologists in the biological sciences are making great strides in research on human aging and documenting this work in monographs texts and review chapters this information is generally not easily accessible nor is it comprehensible to nonprofessionals in these fields This book is intended to provide a summary of this work along with its implications for psychological functioning of the aging individual The majority of the book is devoted to describing the results of research on the physiological changes in the human body with aging and to seeking explanations for these age effects This description has been approached in such a way as to make it readable for the nonspecialist but also to focus on research issues that will be useful reading for those who are currently working in these particular areas In addition throughout the book I have tried to develop some themes regarding physiological and psychological adaptation during adulthood

*Aging Bodies* Christopher A. Faircloth, 2003 Western thought traditionally divides the human being into a body mind dualism a divide realized in the divergent research fields of geriatrics which examines the physical body and gerontology which focuses on the psychological and social aspects of aging

*The Aging Body* Jason L. Powell, 2013-01-01 This book explores the main issues in new social science approaches to understanding the human body and aging In particular the development of postmodernism and its relationship to culture and the body is delineated The book also addresses some of the power issues that manifest in social relationships focused on the body Here the work of Michel Foucault is useful in using conceptual tools to disrupt dominant biomedical narratives relating to the aging body

*Old Age and Agency* Emmanuelle Tulle, 2004 This book is about rethinking the ways in which we make sense of social action or agency in later life The contributions in this collection challenge traditional academic approaches to the study of later life which arguably often deny older people agency Social gerontology and the wider society should be more reflexive and rather than contribute to the continued marginalisation of older people should draw attention to the extent to which the latter's actions may be understood within the set of normalising discourses which people have to manage and negotiate as they get old The purpose of this collection is to continue this process by providing philosophical theoretical conceptual and empirical direction for a reflexive social gerontology This book argues that the management of later life has become complex caught as it is within a broad discourse which continues to construct old age as a time of decline and dependency but has shifted the burden of responsibility for the avoidance of decline on individuals

***Age and Identity in Eighteenth-Century England*** Helen Yallop, 2015-10-06 Yallop looks at how people in eighteenth century England understood and dealt with growing older Though no word for aging existed at this time a person's age was a significant aspect of their identity

***Culture in the Use, Care, and Control of the Aging Body*** Catherine Hagan Hennessy, 1983

***The Aging Body*** Jacqueline D. Bougie, A. Paige Morgenthal, 2001 This text takes a

conservative approach to treatment and management of common neuromusculoskeletal conditions of the elderly covering the basic science of aging including musculoskeletal neurological posture and gait changes

**The Self in Health and Illness** Frances Rapport, Paul Wainwright, 2006 Patients views of their identity change with illness as do health professionals views of them This anthology discusses how and why this happens and examines the awareness of this phenomenon It is intended for students of medical humanities researchers in health sciences and medical ethics psychologists and others

**Rejuvenation of the Aging Body** Neil Sadick, 2016-10-14 There are many books on facial rejuvenation aimed at dermatologists but relatively few covering the whole body Most body rejuvenation books take a surgical approach and are aimed specifically at plastic surgeons However body rejuvenation is a dynamic area encompassing many minimally invasive techniques often derived from facial rejuvenation which are more cost effective and require less downtime than traditional surgical techniques The number of treatment options can be bewildering and Rejuvenation of the Aging Body aims to provide clear instructions on which treatment types to use for each specific problem together with details of any special modifications that must be made for different body areas Chapters describe how best to assess the aging body and build a suitable treatment plan combining all the latest surgical and non surgical techniques to give the best cosmetic results Rejuvenation of the Aging Body is an invaluable guide to the assessment and management of the aging body for trainee and practicing dermatologists dermatologic surgeons and cosmetic surgeons Key points Cuts through the different techniques to explain which procedures are best suited for each specific problem Focuses

on the whole body not just the face and on the key areas that dermatologists and other clinicians treat most often Includes numerous colour photographs that illustrate each technique and its effect on the appearance Features contributions from experienced clinicians edited by a well recognised educator in dermatologic surgery *Ceramic Data Book* ,1928
