Journal of Social Theory was just the right person to bring them into dialogue. Indeed, dialogue and communication are his watchwords for revamping the institutional mission of the university. Professor Steve Fuller, University of Warwick, drawing from current debates in social theory about the changing nature of knowledge, this book offers the most comprehensive sociological theory of the university that has yet appeared. The famous philosophical conceptions of the university from the Enlightenment to postmodern thought are discussed along with the major writings in modern social theory on the university, such as those of Weber, Parsons, Habermas, Gadamer, Lyotard, and Bourdieu. In this far-reaching contribution to the sociology of knowledge, Delanty views the university as a key institution of modernity and as the site where knowledge, culture, and society interconnect. He assesses the question of the crisis of the university with respect to issues such as globalization, the information age, the nation-state, academic capitalism, cultural politics, and changing relationships between research and teaching. Arguing against the notion of the demise of the university, his argument is that in the knowledge society of today a new identity for the university is emerging based on communication and new conceptions of citizenship. It will be essential reading for those interested in changing relationships between modernity, knowledge, higher education, and the future of the university.
