

A vibrant, stylized illustration of a tropical beach scene. On the left, a dark brown palm tree with green fronds leans over a sandy beach. The sky is a mix of bright yellow and orange, with a large, glowing yellow sun. The ocean is a deep blue. On the beach, there are several items: a red and white striped beach ball, a white beach ball, a red starfish, and a pair of red and white flip-flops. The overall style is bold and colorful.

Mohanakumar, 2008-07-03 Stratospheric processes play a significant role in regulating the weather and climate of the Earth system. Solar radiation, which is the primary source of energy for the tropospheric weather systems, is absorbed by ozone when it passes through the stratosphere, thereby modulating the solar forcing energy reaching into the troposphere. The concentrations of the radiatively sensitive greenhouse gases present in the lower atmosphere, such as water vapor, carbon dioxide, and ozone, control the radiation balance of the atmosphere by the two-way interaction between the stratosphere and troposphere. The stratosphere is the transition region which interacts with the weather systems in the lower atmosphere and the richly ionized upper atmosphere. Therefore, this part of the atmosphere provides a long list of challenging scientific problems of basic nature involving its thermal structure, energetics, composition, dynamics, chemistry, and modeling. The lower stratosphere is very much linked dynamically, radiatively, and chemically with the upper troposphere, even though the temperature characteristics of these regions are different. The stratosphere is a region of high stability, rich in ozone, and poor in water vapor, and temperature increases with altitude. The lower stratospheric ozone absorbs the harmful ultraviolet (UV) radiation from the sun and protects life on the Earth. On the other hand, the troposphere has high concentrations of water vapor, is low in ozone, and temperature decreases with altitude. The convective activity is more in the troposphere than in the stratosphere. **Manual of Ornithology** Noble S. Proctor, Patrick J. Lynch, 1993-01-01 Here is a volume that has no parallel.
