Tree Of Here:

The Tree of Here Chaim Potok, 1993 Jason is upset that he has to move for the third time in five years but he gains comfort from his favorite tree and from the gift of a young tree that he can take with him to his new home

Hegel's Grammatical Ontology Jeffrey Reid, 2021-06-17 Reading The Phenomenology of Spirit through a linguistic lens Jeffrey Reid provides an original commentary on Hegel's most famous work Beginning with a close analysis of the preface where Hegel himself addresses the book's difficulty and explains his tortured language in terms of what he calls the speculative proposition Reid demonstrates how every form of consciousness discussed in The Phenomenology involves and reveals itself as a form of language Elucidating Hegel's speculative proposition which consists of the reversal of the roles of the subject and predicate in such a way that the copula of the proposition becomes the lively arena of dialogical ambiguity and hermeneutical openness this book offers new onto grammatical readings of every chapter of The Phenomenology Not only does this bring a new understanding to Hegel's foundational text but the linguistic approach further allows Reid to unpack its complexity by relating it to contemporary contexts that share the same language structures that we discover in Hegel Amongst many others this includes Hegel's account of sense certainty and the critique of the immediacy of consumer culture today

The Valuative Tree Charles Favre, Mattias Jonsson, 2004-09-16 This volume is devoted to a beautiful object called the valuative tree and designed as a powerful tool for the study of singularities in two complex dimensions Its intricate yet manageable structure can be analyzed by both algebraic and geometric means Many types of singularities including those of curves ideals and plurisubharmonic functions can be encoded in terms of positive measures on the valuative tree The construction of these measures uses a natural tree Laplace operator of independent interest

Canopy Cities Timothy Beatley, 2023-12-21 This book provides a comprehensive overview of the essential role of trees and forests in cities and examines the creative approaches cities around the world are taking to protect trees and expand their urban forests Moving beyond the view that trees are luxuries and therefore non essential to the life of a city the book examines urban tree policies and approaches that foster tree protection including tree codes and bylaws and calls for greater community engagement to preserve this important facet of urban life Through an international range of examples and case studies featuring cities in the United States Canada Singapore the Netherlands Australia France New Zealand Mexico Sierra Leone and the United Kingdom The book offers best practice examples where trees have been further integrated into the fabric of urban planning and design including forested towers interior rainforests tiny urban forests and metropolitan forests Written by a leading authority in the field this is a fascinating read for researchers students and practitioners in urban planning landscape architecture and environmental policy and planning
