Weather And Energy:

Weather Matters for Energy Alberto Troccoli, Laurent Dubus, Sue Ellen Haupt, 2014-01-18 It is the purpose of this book to provide the meteorological knowledge and tools to improve the risk management of energy industry decisions ranging from the long term finance and engineering planning assessments to the short term operational measures for scheduling and maintenance Most of the chapters in this book are based on presentations given at the inaugural International Conference Energy Meteorology ICEM held in the Gold Coast Australia 8 11 November 2011 The main aim of the conference was to strengthen the link between Energy and Meteorology so as to make meteorological information more relevant to the planning and operations of the energy sector The ultimate goal would be to make the best use of weather and climate data in order to achieve a more efficient use of energy sources This book seeks to realise the same objective

Management of Weather and Climate Risk in the Energy Industry Alberto Troccoli, 2009-12-21 Meteorological and climate data are indeed essential both in day to day energy management and for the definition of production and distribution infrastructures For instance the supply of electricity to users can be disturbed by extreme meteorological events such as thunderstorms with unusually strong winds severe icing severe cold spells sea level elevation associated with storm surges floods To be protected against such events it is not sufficient to act after they have taken place It is necessary to identify their potential impacts precisely and assess the probability of their occurrence This book shows that this can only be done through an enhanced dialogue between the energy community and the climate and meteorology community This implies an in depth dialogue between actors to define precisely what kind of data is needed and how it should be used M t o France has been in long term cooperation with the energy sector including the fields of electricity production and distribution Drawing on this experience it should be noted in this respect the importance of lo term partnership between actors as exemplified here by the message of EDF
