Lisa-Marie Wagner, 2020-06-18. Bachelor Thesis from the year 2020 in the subject Business Economics, Business Management, Corporate Governance, grade 1.6, language English, abstract. In this paper, the phenomenon of digital nomadism in permanent employment is presented. In general, digital nomads are characterized by their independence of location, their employment in the digital space and common values. Most of them are freelancers and entrepreneurs, but also employees who are part of this movement want to leave the conservative concept of normal employment and break new ground. First, the changes in the business world and the emergence of digital nomadism were presented in this paper. Due to a lack of literature, guideline-based expert interviews were conducted to gain insight into the opportunities and risks of the multi-local lifestyle concept for

employees and companies In addition the framework conditions for companies and digital nomads required by this work and life concept were examined and presented in detail Such a framework condition can mean for example the adaptation of processes and leadership There are also differences between completely remote companies and only partially remote companies which can lead to a split company structure In this context the similarities and differences between traditional telework and digital nomadism in permanent employment were also examined These are similar for example regarding the technical prerequisites that should be created in companies and the changed communication In addition there are challenges and opportunities that arise from the travel component and the nature of digital nomadism such as negatively impaired processes due to time differences or certain characteristics and experiences that digital nomads possess or experience that can be used positively in a professional context Thus this work not only serves a scientific purpose but also provides a practical framework for employing digital nomads in traditional companies

What is a Digital nomad A digital nomad lifestyle is becoming more of the trend and this article will tell you what a digital nomad is and the realities of a Location Independent Business What is a digital nomad and why are there so many people who want to work this way A digital nomad is essentially a person who works for himself Many work at home mothers do this and are known as Full Time Gigs Others work as freelancers and do things a specific way like transcribing editing proofreading or programming However some digital nomads work for service companies and do things like web design web programming accounting creative writing or translation Those who work a digital nomad lifestyle do not work for a company or boss but instead work for themselves They set their own hours and follow their own rules It is difficult to be self employed in this society because you have to rely on the wills of others and your courage to set up your business However it is not impossible and there are different ways to be self employed which can provide you with more freedom and flexibility while still bringing in some money If you want to work at home then this is the technology which is enabling the change and it is allowing nomads to work from home Companies are recognising the

potential of this new method of working and the first areas to embrace the new way of working are the legal ones. However, it is not just the legal firms and public sector which are looking to employment technology in order to cut costs. Almost every type of industry is looking at using technology in order to lower costs and in this way increase profits. For example, restaurants are using recruitment technology in order to lower salaries and costs. Until a few years ago, when every restaurant had a fixed cost of hiring, training and maintenance, the vast majority of restaurants were able to pay 100% of their employees' salaries. This meant that it was possible to pay a manager less than a waiter and save money. However, with the inclusion of recruitment technology, the cost of hiring employees is being cut by up to 50%. This does not necessarily mean that the amount of profit is increased, but employees are able to be assigned to different tasks, meaning that they spend less time in front of customers, thus increasing their profits.

Digital Nomad Lifestyle Bharat Vatsa, 2024-06-18

This book is dedicated to all the Digital Nomads out there in the world who travel freely while working remotely using technology and the internet. Such people generally have minimal material possessions and work remotely in temporary housing, hotels, cafes, public libraries, co-working spaces or recreational vehicles, using Wi-Fi, smartphones or mobile hotspots to access the Internet. The majority of digital nomads describe themselves as programmers, content creators, designers or developers. Some digital nomads are perpetual travellers, while others only maintain the lifestyle for a short period of time. While some nomads travel through multiple countries, others remain in one area and some may choose to travel while living in a vehicle in a practice often known as van dwelling.
