The True Self and False Self Matthew Brett Vaden, 2022-01-06 We go through life focusing our attention on many things But how much do we focus on ourselves We may be aware of many things but are we self-aware This is a question our contemporary culture asks us to consider more and more and words like self-awareness personal identity authenticity and mindfulness are becoming not just buzz words but virtues The ancient dictum know thyself reverberates in all corners of our lives from Disney characters on our TVs to DISC profiles at our workplaces Some of the more mindful members of our society may even be tempted to disdain those who are not as mindful as they are But what if our self-aware culture hailing us to pursue our true selves is unaware of itself What if our definitions of true and false self understanding are myopic slanted towards a narrow solipsism that is actually leading people away from authenticity while all the while championing it If so how would we know Who is best able to define these things and to teach us how to know ourselves truly Matthew Brett Vaden traces the wisdom of past and modern day sages to discover how we can truly discover ourselves

Psychoanalysis for Our Time Jeffrey Rubin, 1998-11 As a psychoanalyst and psychotherapist Rubin argues that psychoanalysis is in need of revision in order to remain relevant today because its interest in both decoding and concealing the truth is simultaneously its strength and weakness Rubin attempts a middle course between blind acceptance and premature dismissal Although parts one and two focus on the history institutions and theory of psychoanalysis the remainder constitutes a non traditional and self consciously experimental approach wherein the author reflects on his own work his theoretical omissions and the unsolved problems in his discourse Annotation copyrighted by Book News Inc Portland OR *Zen and*

Change Your Life's

Direction Jim Taylor, PhD, 2021-05-07 Jim Taylor explores how to harness the four forces that can control our life inertia and propel our lives in the direction of our OWN choosing values self esteem ownership and emotions Many people think of inertia as an object at rest will stay at rest unless a force is exerted on it like a boulder in a field And people can think of their lives in the same way static and unmoving But we aren't stuck in one place as so many express when they are dissatisfied with their lives Rather our lives are moving swiftly and inexorably along a path driven by powerful forces both past and present that is highly resistant to a change in direction As a result small forces such as a modest insight or a brief aha moment aren't enough to catalyze significant change in how we think what we feel or how we act on or react to our world In fact meaningful change can only occur when forces are applied that are greater than the forces that are already propelling our lives Seeing our lives from this dynamic perspective is the foundation for understanding what it takes to bring meaningful and long lasting positive change to our lives Jim Taylor explores the four forces values self esteem ownership and emotions that propel our life inertia which shows itself through the lens with which we view the world the emotional reactions we have the actions that we take and the relationships that we create He then explains how to harness those to our own benefit so that we may steer our lives in the direction of our own choosing rather than allowing our past inertia or outside forces to dictate the direction our lives take By letting our values guide us building our self esteem taking ownership of our decisions and actions and using our emotions as positive fuel we can break free from our past inertia take control of our lives and chart a future of meaning happiness success and connection with confidence commitment and courage
