for the state and its policies. However, official celebrations were often appropriated by citizens for purposes that were unanticipated and unsanctioned by the state. Through celebrations, Soviet citizens created hybrid identities and defined their places in the emerging Stalinist hierarchy, allowing them to uphold the Soviet order while arrests and executions were rampant. This rich look at celebrations reveals the complex dialogues and negotiations between citizens and leaders in the endeavor to create Soviet culture.

*Trees and Tree-planting* John Bradley Peaslee, 1884     **Planting a City in the Tropical Andes** Diego Molina, 2024-09-18

This book reveals how the 19th Century modernisation of Bogot led to a transformation in the social role of plants, showing how this city located in the high altitudes of the tropical Andes turned into a floristic island formed by native introduced wild and cultivated plants. Urbanisation is one of the main forces behind biodiversity loss. Paradoxically, the expansion of cities has made urban environment spaces with a greater number of plant species compared to their surrounding areas. *Planting a City in the Tropical Andes* takes a multidisciplinary approach to shed light on the cultural and ecological mechanisms that have transformed modern cities into what can be described as floristic islands. By drawing upon a wide array of historical sources, this book explains how the 19th century modernization of Bogot, Colombia led to the replacement of traditional botanical practices with technical knowledge which in turn endowed the city with a unique floristic inventory. Through a unique botanical perspective on Latin American urban history, this book uncovers how capitalist dynamics in Bogot transformed plants into providers of clean air and water, and their use in the urban landscape contributed to the cultivation of disciplined citizenry. Placing plants at the forefront of its narrative, the book offers an original contribution to the underexplored history of horticulture in tropical Latin America. It serves as a compelling example of how the creative and conflicting forces of the Anthropocene have forged new environments and previously unseen relationships between people and plants. This volume will be of great use to scholars and students interested in social history, urban environmental histories, and cultural history.
