**Nuclear Weapons in the Changing World** Patrick J. Garrity, Steven A. Maaranen, 2012-12-06 Lawrence Freedman One of the major bonuses of the collapse of communism in Europe is that it may never again be necessary to enter into a sterile debate about whether it is better to be red or dead This appeared as the ultimate question in the great nuclear debate of the early 1980s When put so starkly the answer appeared obvious better to live and struggle in a totalitarian system than to destroy totalitarian and democratic systems alike There were a number of points to be made against this Communist regimes had demonstrated the possibility of being both red and dead while the West had managed successfully to avoid the choice If we allowed nuclear disarmament to become an overriding priority this might encourage excessive respect for Soviet interests and a desire to avoid any sort of provocation to Moscow a point not lost on those in Eastern Europe who were then struggling against repression and could not see why disarmament should be given a higher priority than freedom Now that the old communist states have liberated themselves and the West no longer risks conspiring in their enslavement there is a correspondingly reduced danger of mass death As a result and with so much else of immediate Lawrence Freedman Department of War Studies King's College University of London London WC2R 2LS England Nuclear Weapons in the Changing World Perspectives from Europe Asia and North America

**50 Guns That Changed America** Bruce Wexler, 2023-08-29 The History of America And Our Guns The history of the United States is like it or not interwoven with the history of firearms The young colony needed technologically advanced arms to hunt for food for survival and to maintain a secure base in the face of Native American opposition to European settlers As the Vikings discovered several centuries earlier the Indians were tough opponents expert in the use of bladed weapons and bows The advent of firearms gave European settlers an advantage although it was only a matter of time until the Native Americans gained access to firearms themselves Ironically this was often through unscrupulous white traders Because these superior weapons gained them their freedom the principle of the right to bear arms remains etched into the American psyche to this day Since then the US has been through a terrible Civil War at which time many different guns were invented and deployed against brother Americans each one playing a part in the eventual outcome of the war After the Civil War came a period of frontier establishment when the country consolidated itself

from coast to coast The outside world knows this best as the Wild West and again guns played a big part in civilizing unruly parts of the nation Two world wars also tested America s ingenuity in ensuring that its troops were competitively armed The invention of automatic weapons by John M Browning made this a reality In the post Second World War period the country has had to fight its way through Korea Vietnam and numerous other conflicts in the Middle East and Asia Gun development has not stood still at any time in United States history and this book illustrates fifty examples that form essential parts of that story 50 Guns That Changed America will explore the most significant American weapons from the early days of firepower to the amazing modern guns in use today including Simeon North Hall pistol Dimick plains rifle Spencer carbine rifle Winchester Model 1866 Smith Wesson Army revolver Colt Peacemaker M60 machine gun ArmaLite AR 18 machine gun Each firearm is illustrated in full color with archive photography of the manufacturers and the guns in action where possible
