Developing an Online Curriculum Lynnette R. Porter, 2004-01-01 *Developing an Online Educational Curriculum Techniques and Technologies* acts as a guidebook for teachers and administrators as they look for support with their online education programs. It offers teaching suggestions for everything from course development to time management and community building. The book is designed to provide information to help teachers work more effectively with online tools, develop course materials for existing online courses, work with the internet as a medium of education, and complete daily activities such as evaluating assignments, lecturing, and communicating with students more easily. Administrators are also given support in their efforts to recruit, train, and retain online teachers, allocate resources for online education, and evaluate online materials for promotion and tenure.

Business and Professional Communication Curtis Newbold, Jessie Lynn Richards, 2024-11-06 *Business and Professional Communication: A Human-Centered Approach* prepares students to succeed in today's workplace defined by changing technology, a diversifying workforce, and an increase in remote and hybrid work. Authors Curtis Newbold and Jessie Lynn Richards guide students through the principles, practices, and techniques, helping them see that business communication is more than just a series of documents, meetings, and presentations; it's a human-centered process that requires a holistic understanding of communication across modes and contexts. With accessibility and inclusion leading the way, this text encourages students to be more conscientious, purposeful, and ethical in the way they communicate at work and beyond.

The World Is Your Office Prithwiraj Choudhury, 2025-04-22 A research-based deep dive into a growing phenomenon: companies allowing employees to work from anywhere and how those who adopt this model can boost talent, innovation, and productivity. As the debate around remote versus in-office work rages on, leaders in a wide range of industries continue to implement radically flexible work practices, allowing most if not all of their employees to work from anywhere. Why? They understand that geographic flexibility offers a competitive advantage: the ability to attract and retain top talent globally. In *The World Is Your Office*, Harvard Business School professor Prithwiraj Choudhury, who has been studying this phenomenon for over a decade, takes readers inside the trailblazing companies that are going all in on work from anywhere (WFA) policies. From startups and nonprofits to government agencies and large corporations, Choudhury's research shows why and how these organizations and their employees are benefiting. Drawing insights from this pioneering research, Choudhury also provides an extensive playbook for implementing successful WFA policies, offering leaders concrete strategies to use WFA as a means of hiring and retaining the best talent, effectively manage WFA teams, share knowledge, and combat isolation; leverage AI and automation to extend WFA into manufacturing and other deskless roles; design programs that attract talent to different regions. Filled with actionable insights and extensive case studies, *The World Is Your Office* empowers leaders to embrace the future of work.
